PREFACE

DATE: January 9, 2012

TO: Interested Parties

FROM: Steven W. Sturgess, Missouri Public Drinking Water Branch Chief

SUBJECT: 2012 Census of Missouri Public Water Systems

The Missouri Department of Natural Resources is pleased to publish the annual Census of Missouri Public Water Systems. This census provides government entities, the regulated community and citizens of the state with detailed information regarding the volume, sourcewater type, population and other characteristics of water systems. In addition, test results for selected chemicals are included along with the types of treatments used by Missouri water systems.

We hope this report will serve as a helpful reference guide when you are reviewing a permit, inspecting a water system, or simply wanting to know more about the water coming our of your tap. The census is available online and can be found at:

dnr.mo.gov/env/wpp/census.html

While this publication provides summary information about individual water systems, additional resources are available. Our Annual Compliance Report of Missouri Public Drinking Water Systems indicates violations by individual water systems as well as statewide data for the calendar year and is available at:

dnr.mo.gov/env/wpp/fyreports/index.html

If you need additional copies of the census or have other comments and concerns, please call the department's Public Drinking Water Branch at 800-361-4827 or 573-751-5331.

INTRODUCTION
KEY TO CODES AND ABREVIATIONS

The community water system inventory information section contains data on community public water systems regulated by the Missouri Department of Natural Resources' Public Drinking Water Branch. A community public water system serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). These systems include but are not limited to cities, water districts, subdivisions, mobile home parks, and institutions.

Community water system inventory information provides basic information such as the required water system operator level and the required distribution system operator level, the year the system began providing water, the ownership type, the number of people served and the number of service connections. These systems are divided by type of community into three alphabetical lists. The first list contains city systems, the second list contains water district systems and the third list contains subdivision, mobile home park, institution and miscellaneous systems. This section also provides a list of systems that sell water and whom they sell to, as well as a list of systems that buy water and whom they buy from.

AVG = Average
MGD = Million Gallons per Day

WATER SYSTEM OPERATOR LEVEL (Listed 1st, if available, under Operator Level, example: "A1", or "A "):

A – Requires a minimum of 5 ½ years of plant operator experience.
B – Requires a minimum of 3 ½ years of plant operator experience.
C – Requires a minimum of 1 ½ years of plant operator experience.
D – Requires a minimum of ½ year of plant operator experience.

DISTRIBUTION SYSTEM OPERATOR LEVEL (Listed 2nd, if available under Operator Level, Example: "A1" or " 1"):

1 – Requires a minimum of ½ year of distribution operations experience.
2 – Requires a minimum of 1 year of distribution operations experience.
3 – Requires a minimum of 3 years of distribution operations experience.

Both the water system operator level and the distribution systems operator level for community public water systems are classified according to system capacity, source of water, character of water, character of water being produced, complexity of treatment and other physical conditions that may affect a system. The department uses this classification system to determine the certification level necessary for the chief operator to supervise the operation of a facility (Missouri Safe Drinking Water Regulations 10 CSR 60-14.010).

OWNER TYPE:
F – Federal Government
P – Private
S – State Government
L – Local Government

SOURCE WATER PERCENTAGES:

PCT GRD = Percent of Source that is Groundwater
PCT PUR GRD = Percent of Source that is Purchased Groundwater
PCT PUR SUR = Percent of Source that is Purchased Surface Water
PCT SUR = Percent of Source that is Surface Water
PCT GW UNDER INFL = Percent of Source that is Groundwater under influence of Surface Water
PCT PUR GW UND INFL = Percent of Source that is Purchased Groundwater under influence of Surface Water

IV. NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION INTRODUCTION

The noncommunity water system inventory information section contains data on noncommunity public water systems regulated by the Missouri Department of Natural Resources' Water Protection Program, Public Drinking Water Branch. There are two types of noncommunity public water systems. One type of noncommunity public water system is a transient noncommunity public water system. This is a public water system that is not a community water system, which has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least sixty days out of the year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part the population changes daily. These systems include, but are not limited to, recreational areas, restaurants, highway rest areas, hotel/motels, campgrounds, etc. The second type of noncommunity public water system is a nontransient noncommunity public water system. This is a public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the same population returns daily to the facility. These systems include, but are not limited to, factories, large businesses and industries, schools, etc.

Noncommunity water system inventory information contains a complete listing of active noncommunity water systems. This list contains the system name, county of location, system identification number, system type and season begin and end dates. The noncommunity listing is first by county and then alphabetical within the county.

VII. CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS
INTRODUCTION
KEY TO CODES

The chemical analyses of community water systems section contains data on inorganic chemical test results. Under Missouri's Public Drinking Water Regulations (10 CSR 60-4), systems utilizing surface water sources in whole or in any part are required to submit water samples every year for chemical analyses. Those systems utilizing only groundwater sources are required to submit water samples for nitrates every year and inorganic chemical samples once every three years. These analyses are performed by the Missouri Department of Natural Resources' laboratory. Results are given in this section for a group of common inorganic chemicals that each community system tests for, and the value provided represents the most recent sample for the chemical. If no result is listed, the water system has never been sampled for the specified chemical. This may be because the water system is newly activated, or the water system has recently been reclassified as a community water system.

Below is a list of chemicals included in this section. In parentheses behind some of the chemicals are suggested upper limits or regulatory maximums given in Milligrams Per Liter. In addition to the below named chemicals, analyses was also completed for the following inorganic chemicals: Arsenic, Barium, Cadmium, Chromium, Lead, Mercury, Selenium, and Thallium. The complete results of all of the chemical analyses are on file in the office of the Missouri Department of Natural Resources' Public Drinking Water Branch, and can be viewed at www.dnr.mo.gov/DWW/.
