GRAVOIS-JEFFERSON STREETCAR SUBURB HISTORIC DISTRICT
CONTRIBUTING PROPERTIES

This information is provided to assist owners seeking more information about their properties and those seeking historic rehab tax credits for the rehab of certified historic structures, particularly those filling out Part 1 of the federal application. Please note that a particular building which may have been determined to be a contributing element in the district when it was listed in the National Register 5/11/2005, may have been so altered since that point that it is no longer a certified historic structure for the purposes of historic rehab tax credits — this determination is made based on photographic evidence provided with the Part 1 (federal) or Part 1a (state) form submitted at the beginning of any historic rehab tax credit project.

The district, which includes 4,642 contributing properties, is significant for its association with early suburbanization within the St. Louis city limits made possible by the development of streetcar lines. The late 19th and early 20th century residential, educational, religious and commercial properties that are listed below represent the move of the working- and middle-classes to new neighborhoods in an effort to find relief from more crowded and often polluted neighborhoods in older sections of the city.

IMPORTANT NOTE: Because the preparers organized the list based on building type rather than street address or block number and because they generated the entries from a database, it is best searched by a single street number, i.e. **3626** rather than **3626-28** or **3626 Michigan**; searching it by street number + name will likely result in the searcher missing an address that is in fact included. In addition, mistakes may occur. *If a building seems possibly eligible but does not appear on this list, please call Kris Zapalac, the State Historic Preservation Office (SHPO) staff member in the St. Louis Regional Office of the Missouri Department of Natural Resources at 314/416-6206 or the National Register co-ordinator at 573/751-7800.*

The text that follows is taken from the nomination that was signed by the Keeper of the National Register of Historic Places on May 11, 2005 and amended as approved by the Keeper June 24, 2008.

A. CONTRIBUTING RESIDENTIAL PROPERTIES

There are 3,672 contributing residential resources in the District. They are composed of the following domestic building functional property types and sub-types as outlined in Sections E and F of the Multiple Property Submission "South St. Louis Historic Working- and Middle-Class Streetcar Suburbs."

SINGLE-FAMILY RESIDENCES (c.1875-c.1940)

The Single-Family property type includes properties erected exclusively for single-family residences between c.1875 and c.1940 in the District. Those found in the District include high style examples of the Second Empire, Queen Anne, Craftsman, and Tudor Revival styles, as well as vernacular adaptations of National Folk House forms, including American Four Square, Bungaloid, Gabled Ell, Upright and Wing, Composite[1], and Flounder houses, as documented in Sections E and F of the Multiple Property Submission "South St. Louis Historic Working- and Middle-Class Streetcar Suburbs."
