Wichita List

Index of Core Drill Holes

Ray & Caldwell Counties, Missouri

Core Holes listed by number; sample boxes range in number from No. 844 to No. 878 (but certain numbers are skipped) core boxes are labeled from M-1 to M-34 inclusive. Note that in several cases the cores from two or more holes may be filed in same box. Note that the numbering system of the Wichita material is different from the Tulsa material, hence no confusion should result between the two.
