RE: Approval of 2010 Amendments to the Sampling and Analysis Plan for Groundwater and Surface Water, Expert Management, Incorporated, Carthage, Missouri, Facility
EPA ID# MOD077887909

Dear Ms. Hoover:

The Missouri Department of Natural Resources (Department) received Expert Management Incorporated's 2010 Sampling and Analysis Plan Amendments on September 1, 2010. The Department notes that the 2010 Amendments supplement the Base Sampling and Analysis Plan that was approved September 30, 2009. Based on the changes in the groundwater monitoring schedule, the Department determined that the Sampling and Analysis Plan Amendments would be a Class 1 Permit Modification requiring prior director approval.

The Department has completed a review of the 2010 Amendments referenced above. Wells MW-101, MW-66, and MW-35 will be sampled for Appendix IX constituents as per the Missouri Hazardous Waste Management Facility Part I Permit. The additional sampling obtained from the 2010 Amendments List will help fill data gaps previously identified, monitor locations of intermediate concentration, monitor areas downgradient of recent remediation activities, and provide for re-sampling of some areas that have not been sampled in recent sampling events. The Department approves the 2010 Amendments to the Sampling and Analysis Plan.

Expert Management Incorporated, must send a notice of the modification to everyone on their facility mailing list and the appropriate units of state and local government within 90 calendar days after the date of this letter, as outlined in Code of Federal Regulations 40 CFR 270.42(a)(1)(ii). Expert Management, Incorporated, must send a copy of the notice to the Department.
