

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: December 8, 2010

Water Body Under Evaluation:

Water Body ID #: 0070
Name: Bridge Creek (Class C)
Length of Segment: 27.0 miles
County (ies): Lewis and Knox

Use Attainability Analysis (UAA) Study:

UAA ID #: 0965
Submitter: MEC Water Resources
Date(s) Conducted: September 25-26, 2008
Date Received: October 17, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in September 2008 and no evidence of WBCR was observed. A 2005 UAA noted the presence of footprints and fishing tackle. No interviews were conducted.

Is the evaluated use attainable? Yes No

Comments: The stream met the maximum depth criterion at 13 of 16 sites and the median depth criterion at 3 of 16 sites. Because the depth criteria were met, the committee recommends the WBCR use be retained. Due to evidence of secondary contact recreation (footprints and fishing tackle), the committee recommends that the secondary contact recreation use be assigned.

Committee Recommendation:

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
