

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 9, 2010

Water Body Under Evaluation:

Water Body ID #: 0406
Name: Tabo Creek (Class C)
Length of Segment: 8.4 miles
County (ies): Lafayette

Use Attainability Analysis (UAA) Study:

UAA ID #: 0937
Submitter: SES, Inc.
Date(s) Conducted: September 11, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in September 2008 and no WBCR was observed. The maximum depth criteria were met at 2 of 5 sites. No interviews were conducted during this survey.

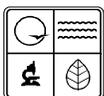

Is the evaluated use attainable? Yes No

Comments: The stream met the maximum depth criteria for WBCR, however upon farther investigation it was determined that 7.56 cm or 2.97 inches of precipitation fell the 10 days leading up to study. In fact, it rained 9 of the 10 days before the study. The committee found this study to be inconclusive because it was not conducted at base flow conditions. Therefore, the WBCR use can not be removed.

Committee Recommendation:

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
