Comments: The UAA survey was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey and no comments were received.

Is the evaluated use attainable? Yes No

Comments: The stream met the maximum depth criterion at 4 of the 7 sites evaluated. Also, the 2005 RCR cites a landowner comment indicating that the stream has “many deep pools”. Due to this comment and the stream meeting the maximum depth criterion, the committee recommends the WBCR use designation be retained.
