

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: 3/15/2011

Water Body Under Evaluation:

Water Body ID #: 0983U-02 (unclassified)
Name: unnamed tributary to Roark Branch
Length of Segment: 0.5 mile
County(ies): Cole

Use Attainability Analysis (UAA) Study:

UAA ID #: 1379
Submitter: Missouri Department of Natural Resources
Date(s) Conducted: March 15, 2011
Date Received: N/A
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The department received public comments in July 2008 that cite fishing, wading and playing as uses that occur on this stream. One commenter noted that children engage in some of these activities on the stream. Originally swimming was also noted on this stream segment but a follow-up phone call on March 22, 2011 determined that the stream is too shallow for WBCR.

Is the evaluated use attainable? Yes No

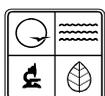

Comments: A formal UAA study was not conducted and depth measurements were not made. However, due to comments citing secondary contact recreation (SCR), the committee recommends that the SCR use be assigned. Due to the presence of fishing on this segment the stream should be classified and have aquatic life use added as well.

Committee Recommendation:

- Add Use Retain Use Remove Use
- Modify Use Inconclusive
