

**DRAFT**      **Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation:    February 17, 2009

Water Body Under Evaluation:

Water Body ID #:    2879  
Name:                Wolf Creek (Class C)  
Length of Segment:    8 miles  
County(ies):        St. Francois

Use Attainability Analysis (UAA) Study:

UAA ID #:            0788  
Submitter:            MEC Water Resources  
Date(s) Conducted:    October 29-30, 2007  
Date Received:        December 1, 2007  
Use Evaluated:        Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975?     Yes       No       Unknown

Comments:    The UAA survey was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey and no comments were received. However, comments received for the 2005 UAA cite secondary contact recreation: children playing and adults wading in the stream.

Is the evaluated use attainable?                       Yes       No

Comments:    The stream met the maximum depth criterion at 2 out of 5 sites evaluated. Due to the stream meeting the maximum depth criterion the committee recommends the WBCR use designation be retained. Due to secondary contact use documented in 2005, the committee recommends Secondary Contact Recreation be assigned.

**Committee Recommendation:**

- Add Use                       Retain Use                       Remove Use
- Modify Use                       Inconclusive

Committee Members:                      Anne Peery, Bill Whipps, Mike Kruse
