STATE OF MISSOURI

DEPARTMENT OF NATURAL RESOURCES

MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: 032008-004  Project Number: 2008-01-064

Parent Company: ADESA, Inc.

Parent Company Address: 13085 Hamilton Crossing Blvd., Carmel, IN 46032

Installation Name: ADESA Missouri

Installation Address: 157th Street and Elmwood Avenue, Belton, MO 64012

Location Information: Cass County, S2, T46N, R33W

Application for Authority to Construct was made for:
Installation of a new body shop and paint booth for surface coating operations. The new installation will consist of three (3) spray booths, three (3) prime booths and a "touch-up/air brush" room. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required.

☐ Standard Conditions (on reverse) are applicable to this permit.

☒ Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

MAR 7 2008

EFFECTIVE DATE

DIRECTOR OR DESIGNEE
DEPARTMENT OF NATURAL RESOURCES
STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the department’s Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant source(s). The information must be made available not more than 60 days but at least 30 days in advance of this date. Also, you must notify the Department of Natural Resources Regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of this permit and permit review shall be kept at the installation address and shall be made available to Department of Natural Resources’ personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant source(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit at (573) 751-4817. If you prefer to write, please address your correspondence to the Missouri Department of Natural Resources, Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176, attention: Construction Permit Unit.
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (12)(A)10. “Conditions required by permitting authority.”

ADESA Missouri
Cass County, S2, T46N, R33W

1. Emission Limitation – Volatile Organic Compounds (VOC)
   A. ADESA Missouri shall emit less than 40 tons of Volatile Organic Compounds (VOCs) from the entire installation in any consecutive 12-month period.
   
   B. ADESA Missouri shall emit less than ten (10) tons individually or twenty-five (25) tons combined of Hazardous Air Pollutants (HAPs) from the entire installation in any consecutive 12-month period.
   
   C. Attachment A, Attachment B and Attachment C, or equivalent forms approved by the Air Pollution Control Program shall be used to demonstrate compliance with Special Conditions 1(A) and 1(B). ADESA Missouri shall maintain all records required by this permit for not less than five (5) years and shall make them available immediately to any Missouri Department of Natural Resources’ personnel upon request. These records shall include Material Safety Data Sheets (MSDS) for all materials used at the installation.
   
   D. ADESA Missouri shall report to the Air Pollution Control Program’s Enforcement Section, P.O. Box 176, Jefferson City, MO 65102, no later than ten (10) days after the end of the month during which the records from Special Condition Number 1(C) indicate that the source exceeds the limitation of Special Conditions Number 1(A) and 1(B).

2. Operational Requirements
   ADESA Missouri shall keep solvents and cleaning solutions in sealed containers whenever the materials are not in use. ADESA Missouri shall provide and maintain suitable, easily read permanent markings on all solvents and cleaning solution containers used at this installation.

3. Control Device – Booth Filtration System.
The booth filtration system must be in use at all times when the spray and prime booths are in operation and shall be operated and maintained in accordance with the manufacturers’ specifications.
REVIEW SUMMARY

- ADESA Missouri has applied for authority to construct a new surface coating operations. The new installation will consist of three (3) spray booths, three (3) prime booths and a “touch-up/air brush” room.

- Hazardous Air Pollutant (HAP) emissions are expected from the proposed equipment. HAPs of concern from this process are ethylbenzene, methyl isobutyl ketone, xylene, 1,6 hexamethylene diisocyanate, toluene, and methanol.

- None of the New Source Performance Standards (NSPS) apply to the proposed equipment.

- None of the National Emission Standards for Hazardous Air Pollutants (NESHAPs) or currently promulgated Maximum Achievable Control Technology (MACT) regulations applies to the proposed equipment. Neither Subpart MMMM—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Miscellaneous Metal Parts and Products, nor Subpart III—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks, apply to this installation since the installation is neither a major source of HAP nor does it surface coat new automobile or new light-duty truck bodies or body parts for new automobiles or new light-duty trucks.

- A booth filtration system will be used in association with the new equipment to control PM$_{10}$ emissions.

- This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of VOCs and HAPs are conditioned to de minimis levels.
• This installation is located in Jackson County, a maintenance area for ozone (O₃) and an attainment area for all other criteria air pollutants.

• This installation is not on the List of Named Installations [10 CSR 10-6.020(3)(B), Table 2].

• Ambient air quality modeling was not performed since potential emissions of the application are conditioned to de minimis levels.

• Emissions’ testing is not required for the equipment.

• No Operating Permit is required for this installation.

• Approval of this permit is recommended with special conditions.

INSTALLATION/PROJECT DESCRIPTION

On January 30, 2008 the Air Pollution Control Program received a request from DECA Environmental & Associates, Inc. to amend permit 122006-011. Their request stated that after receiving the permit, ADESA decided to change the location of the site from Lee’s Summit to Belton. A change of location requires a separate New Source Review (NSR) permit because the installation has not been constructed and no modeling was required by the original NSR permit, the address was changed on the original NSR permit and the permit was re-issued.

ADESA Missouri is a wholesale auto auction located in Belton, Missouri. ADESA Missouri has applied for authority to construct a new surface coating operation. The new installation will consist of three (3) spray booths, three (3) prime booths and a “touch-up/air brush” room. When weather permits the touch-up/air brush operation may move to a designated outside area. Topcoat, basecoat, sealer and primer coatings will be used in the surface coating process. Surface cleaners and clean-up solvents will also be used. The majority of emissions that will occur during the surface coating are VOCs and HAPs that evaporate from the solvents contained in the coatings.

Each spray booth has associated with it three (3) air makeup units (AMU) each rated at 1.5 MMBtu. The prime booths each have one (1) 1.5 MMBtu AMU giving a total heat input for the AMUs of 18 MMBtu. The AMUs use natural gas as the fuel.

EMISSIONS/CONTROLS EVALUATION

A material balance approach was used in the analysis of PM₁₀, VOC and HAP emissions. For VOC and HAP-containing materials, the amount of pollutant emitted is assumed to be 100 percent of the amount of pollutant contained in the material, since no control device is used to remove or destroy the VOC or HAP in the exhaust stream.
The maximum hourly design rate is based upon a maximum of 7.06 gallons of total coating used per 8-hour period (0.882 gallon per hour) in each spray booth and 2.86 gallons of total coating used per 8-hour period (0.357 gallon per hour) in each prime booth. Maximum usage of surface cleaners and clean-up solvents were based upon historical usage per 8-hour period in similar processes.

Percentage of VOC and HAP by weight and densities of the coatings were determined from Material Safety Data Sheets (MSDS) provided by the applicant.

PM$_{10}$ emissions were evaluated based on the solid content of the coatings used and a transfer efficiency of 65%. A booth filtration system with a control efficiency of 95% is used in conjunction with the spray and prime booths.

Potential emissions of the application represent the potential of the new equipment, assuming continuous operation (8760 hours per year). Since this is a new installation there are no existing actual emissions or existing potential emissions under construction permits. The applicant requested an installation-wide limit on VOC and HAP emissions to remain a de minimis source. Therefore, a 40 ton per year VOC and a 10 ton per year individual or 25 ton per year combined HAPs limit for the entire installation was imposed. Table 1 below provides an emissions summary for this project.

### PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Potential emissions of VOC and HAP are conditioned to below de minimis levels.
APPLICABLE REQUIREMENTS

ADESA Missouri shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved.

GENERAL REQUIREMENTS

- Submission of Emission Data, Emission Fees and Process Information, 10 CSR 10-6.110
  
  The emission fee is the amount established by the Missouri Air Conservation Commission annually under Missouri Air Law 643.079(1). Submission of an Emissions Inventory Questionnaire (EIQ) is required April 1 for the previous year's emissions.

- Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin, 10 CSR 10-6.170

- Restriction of Emission of Visible Air Contaminants, 10 CSR 10-6.220

- Maximum Allowable Emission of Particulate Matter From Fuel Burning Equipment Used for Indirect Heating, 10 CSR 10-2.040

- Restriction of Emission of Odors, 10 CSR 10-2.070

SPECIFIC REQUIREMENTS

- Restriction of Emission of Particulate Matter From Industrial Processes, 10 CSR 10-6.400
STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, I recommend this permit be granted with special conditions.

RE:  New Source Review Permit - Project Number: 2008-01-064  

Dear Mr. Neal:  

On January 30, 2008 the Air Pollution Control Program received a request from DECA Environmental & Associates, Inc. to amend permit 122006-011. Their request stated that after receiving the permit, ADESA decided to change the location of the site from Lee’s Summit to Belton. A change of location requires a separate New Source Review (NSR) permit. Because the installation has not been constructed and no modeling was required by the original NSR permit, the address was changed on the original NSR permit and the permit was re-issued.  

If you have any questions regarding this permit, please do not hesitate to contact Michael Mittermeyer at the departments’ Air Pollution Control Program, P.O. Box 176, Jefferson City, MO  65102 or (573) 751-4817. Thank you for your attention to this matter.  

Sincerely,  

AIR POLLUTION CONTROL PROGRAM  

Kendall B. Hale  
New Source Review Unit Chief
