

Section (4): Portable Source Relocation Request

Regulated Activities: The relocation of industrial emission sources designed for and capable of being moved to other sites around the state. Typically this section applies to portable concrete, asphalt or crushing plants. The equipment must have been previously permitted under Section (5) or Section (6). Each new location is evaluated in accordance with Section (5) or Section (6).

Fees: Previously approved sites: No review fee.
Relocation to new sites: \$200 flat fee is required. No additional review fee is charged.

Required Documents: Report of Portable Source Relocation form, maps of location, source layout, associated site specific documentation (haul roads/storage pile information), and emission calculations. The relocation forms are found on page 14-16 of the construction permit application at the following website:
<http://www.dnr.mo.gov/forms/780-1323-f.pdf>
Spreadsheets for calculating the potential to emit and air quality impact are found at the following websites:
<http://www.dnr.mo.gov/env/apcp/permits/NSR/quarryemissions.xls>
<http://www.dnr.mo.gov/env/apcp/permits/NSR/concreteemissions.xls>
In addition, paper copies are available by contacting the Air Pollution Control Program.

Length of Permit: The relocation permit is valid for two years from date of starting operations at an approved site or until the date specified in the approved relocation request.

Processing Time: 7 days for previously approved locations that have no change in operation.
21 days for new location for previously permitted equipment.

Public Participation: None required

Applicable Statutes: RSMo 643.075

Applicable Rules: 10 CSR 10-6.060, 10-6.020 and 10-6.010
