Greensboro, NC 27420

**Approval 2008-2**

Dear Mr. Parikh:

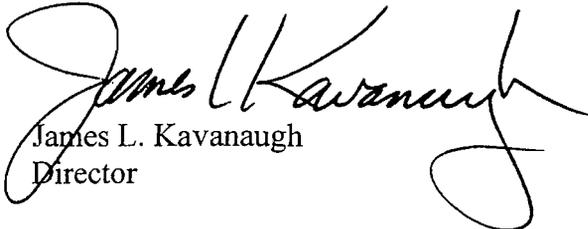

The Missouri Department of Natural Resources' Air Pollution Control Program has received your letter of August 7, 2008, requesting the approval of the Gilbarco angled hose outlet casting on Gilbarco balance vapor recovery dispensers.

The Technical Review Committee conducted an engineering review of the angled hose outlet casting and considered the CARB testing and approval of said outlet casting. The Committee determined that the modification (angled) to the straight outlet casting, already approved, would not adversely affect the vapor recovery efficiency. Therefore, please consider this letter as your approval of the new angled Gilbarco outlet hose casting.

As all Missouri performance evaluation test procedures approvals are based on the previous CARB EVR approvals, all conditions and limitations of that certification are part of the Missouri performance evaluation test procedures approval. We thank you for your concern and cooperation to these issues. If you have any questions, you may contact Mr. Bud Pratt at the department's Air Pollution Control Program, P.O. Box 176, Jefferson City, Missouri 65102-0176, or by telephone at (573) 751-4817.

Sincerely,

**AIR POLLUTION CONTROL PROGRAM**

  
James L. Kavanaugh  
Director
