Missouri is proposing to recommend boundary designations (e.g. attainment, nonattainment, unclassifiable) for the 2010 1-hour Sulfur Dioxide (SO₂) standard. These recommendations address two areas of the state containing a total of three sources identified as meeting criteria specified in the federal Data Requirements Rule for round four of SO₂ designations. The proposed recommendations are based on technical evaluations of these areas using air quality monitoring data. The evaluation also includes air quality modeling to inform the recommended boundary for the area containing the violating monitor. The air program intends to submit these recommendations to EPA by May 1, 2020. EPA must finalize designations for these areas by December 31, 2020. This action will not be submitted for inclusion in the Missouri State Implementation Plan.
