STATE OF MISSOURI

DEPARTMENT OF NATURAL RESOURCES

MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: 052013-011 Project Number: 2013-01-024
Parent Company: Broder Cremation Service, Inc.
Parent Company Address: 3421 Ehlman Road, St. Charles, MO 63301
Installation Name: Broder Cremation Service, Inc.
Installation Number: 183-0248
Installation Address: 3421 Ehlman Road, St. Charles, MO 63301
Location Information: St. Charles County, LG 291

Application for Authority to Construct was made for: Replacement of the existing A-200H/250HT cremator with a new A-300HT cremator manufactured by American Crematory Equipment Company. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required.

☐ Standard Conditions (on reverse) are applicable to this permit.
☐ Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

MAY 21 2013

EFFECTIVE DATE

DIRECTOR OR DESIGNEE
DEPARTMENT OF NATURAL RESOURCES
STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devises shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Departments' Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant sources(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department of Natural Resources Regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of this permit and permit review shall be kept at the installation address and shall be made available to Department of Natural Resources' personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant sources(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit at (573) 751-4817. If you prefer to write, please address your correspondence to the Missouri Department of Natural Resources, Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176, attention: Construction Permit Unit.
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (12)(A)10. “Conditions required by permitting authority.”

Broder Cremation Service, Inc.
St. Charles County, LG 291

1. Superseding Condition
   The conditions of this permit supersedes Special Condition 1 of Permit 092011-007 found in the previously issued construction permit issued by the Air Pollution Control Program.

2. Mercury Emission Limitation
   A. Broder Cremation Service, Inc. shall emit less than 0.01 tons of mercury from the three human crematories located at this site (EU-01, EU-02, EU-04) in any 12-month period.

   B. Attachment A or an equivalent form, such as electronic forms, approved by the Air Pollution Control Program shall be used to demonstrate compliance with Special Condition 2.A.

3. Process Requirements for the Human Crematory (EU-04)
   A. Broder Cremation Service, Inc. shall burn exclusively non-infectious human bodies or body parts (as defined in the Installation Description) and containers not containing chlorine.

   B. Charging of remains during burn cycles is prohibited.

   C. Opening the door during a burn cycle is prohibited.

   D. The crematory shall be equipped with a continuous chart recorder that monitors, displays and records the temperature in the final combustion chamber with an accuracy of two percent (±2%).

   E. Broder Cremation Service, Inc. shall maintain the temperature in the final combustion chamber at or above 1600 degrees Fahrenheit.

   F. Broder Cremation Service, Inc. shall maintain an accurate record of the
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

number of cremations and the total mass of remains cremated at this installation per month.

4. Opacity
The crematory (EP-04) shall have opacity of less than ten percent (10%) at all times.

5. Requirements for Operators of the Human Crematory (EU-04)
A. All crematory operators shall attend a training program equivalent to that developed by the American Society of Mechanical Engineers (ASME), by the crematory manufacturer or by an individual with more than one (1) year experience in the operation of the crematory. The training shall include basic combustion theory, operating procedures, monitoring of combustion control parameters and all emergency procedures to be followed if the crematory should malfunction or exceed operating parameters.

B. The crematory operator shall have the essential steps necessary for satisfactory operation of the crematory readily available to him or her in an easy to read and follow manual.

6. Restriction of Emission of Odors
If a continued situation of verified nuisance odors exists in violation of 10 CSR 10-6.165, the Director may require through written notice that Broder Cremation Service, Inc. submit within ten days a corrective action plan adequate to timely and significantly mitigate the odors. Broder Cremation Service, Inc. shall implement any such plan immediately upon its approval by the Director. Failure to either submit or implement such a plan shall be in violation of this permit.

7. Record Keeping and Reporting Requirements
A. Broder Cremation Service, Inc. shall maintain all records required by this permit for not less than five (5) years and shall make them available immediately to any Missouri Department of Natural Resources’ personnel upon request.

B. Broder Cremation Service, Inc. shall report to the Air Pollution Control Program’s Enforcement Section, P.O. Box 176, Jefferson City, MO 65102, no later than ten days after the end of the month during which any record required by this permit show an exceedance of a limitation imposed by this permit.
RÉVÉLATION DU DEMANDE DE DUGIÈRE AUTHENTIQUE DE CONSTRUIRE ET D'OPÉRER
SÉANCE (5) DÉBUT
N° de projet: 2013-01-024
N° d'identification de l'installation: 183-0248
N° de permis: 

3421 Ehlman Road
St. Charles, MO 63301

Parent Company:

3421 Ehlman Road
St. Charles, MO 63301

St. Charles County, LG 291

RÉVÉLATION RÉSUMÉ

- Broder Cremation Service, Inc. a demandé l'autorisation de remplacer le cimenterie A-200H/250WH existante (EU-03) avec une nouvelle cimenterie A-300HT (EU-04) fabriquée par American Crematory Equipment Company.

- Les émissions de Polluants à Haute Concentration (HAP) sont attendues de l'équipement proposé. Les HAPs de préoccupation de cette procédure sont les combustions des os et du gaz naturel.

- Aucun des Standards de Performance Nouveau Source (NSPS) ne s'appliquent à l'installation.

- Aucun des Standards d'Emission Nationaux des Polluants à Haute Concentration (NESHAPs) n'apportent à cette installation. Aucun des réglementations Maximum Achievable Control Technology (MACT) promulguées actuellement n'apportent à l'équipement proposé.

- Un second compartiment de combustion est utilisé pour contrôler les émissions de l'équipement dans cette autorisation.

- Cet examen a été effectué conformément à la Section (5) du Règlement d'Etat Missouri 10 CSR 10-6.060, Autorisations de Construction. Les émissions de polluants à critères possibles sont en dessous du niveau de de minimis. Section (1)(B) exige que toutes les incinérateurs obtiennent des autorisations de construction.

- Cette installation est située dans le Comté de St. Charles, une zone non atteinte pour la norme à 8 heures de l'ozone et la PM2.5 et une zone atteinte pour toutes les autres polluants à critères.

- Cette installation n'est pas parmi la Liste des Installations Nommées trouvées dans 10 CSR 10-6.020(3)(B), Table 2. La source majeure de l'installation pour les VOC, PM10, PM2.5, et NOx est de 100.0 tonnes par année. La source majeure de l'installation est de 250 tonnes par
year and fugitive emissions are not counted toward major source applicability for all other criteria pollutants.

- Ambient air quality modeling was not performed since potential emissions of the application are below de minimis levels. Potential mercury emissions have been limited below the SMAL for the entire facility.

- Emission testing is not required for the equipment. Stack testing was conducted on a similar unit and approved by the Air Pollution Control Program.

- A Basic Operating Permit application is required for this installation within 30 days of equipment startup.

- Approval of this permit is recommended with special conditions.

INSTALLATION DESCRIPTION

Broder Cremation Service, Inc. (herein referred to as Broder) currently operates a model A-200H/250HT cremator (EU-03) that was manufactured by American Crematory Equipment Company under permit number 092011-007, an N-20AA cremator (EU-01), and a Phoenix II-1 (EU-02) manufactured by B&L Systems. Broder operates the crematories at 3421 Ehlmann Road, St. Charles, Missouri. The A-200H/250HT cremator (EU-03) will be replaced by a new A-300HT cremator (EU-04) because of malfunction.

The following permits have been issued to Broder Cremation Service, Inc. from the Air Pollution Control Program.

Table 1: Permit History

PROJECT DESCRIPTION

Broder Cremation Service Inc. has applied for the authority to construct a new American Crematory A-300HT 2.5 MMBtu/hr crematory that fires natural gas. The crematory is a multiple chamber unit with a rated capacity of 150 pounds per hour. A stack test conducted on a similar unit (A-300HT) was conducted by World Environmental at Rose Hills Co. on March 28, 2013. This test was approved by the Air Pollution Control Program because the testing was run on the same model crematory. Results of that test demonstrated emissions from the incinerator. The crematory was required to submit stack test result/test to demonstrate compliance with the programs requirements for crematories. These requirements include that the crematory achieve a combustion efficiency of 99.9%, that the maximum particulate concentration in the crematory's stack gas is less than 0.09 grains per dry standard cubic feet and that the crematory’s opacity does not exceed 10%. These requirements were developed to ensure proper combustion, which ensures destruction of HAPs.
The crematory is permitted to cremate non-infectious human bodies and body parts. The Air Pollution Control Program’s definition of this term is human bodies and body parts that do not fit the definition of medical/infectious waste as defined in the Code of Federal Regulations, 40 CFR 60.51, *Standards of Performance for New Stationary Sources*, Subpart Ec—“Standards of Performance for Hospital/Medical/Infectious Waste Incinerators for Which Construction is Commenced After June 20, 1996.” The rule defines medical/infectious waste as:

**Medical/infectious waste** means any waste generated in the diagnosis, treatment, or immunization of human beings or animals, in research pertaining thereto, or in the production or testing of biologicals that are listed in paragraphs (1) through (7) of this definition. The definition of medical/infectious waste does not include hazardous waste identified or listed under the regulations in part 261 of this chapter; household waste, as defined in §261.4(b)(1) of this chapter; ash from incineration of medical/infectious waste, once the incineration process has been completed; human corpses, remains, and anatomical parts that are intended for interment; and domestic sewage materials identified in §261.4(a)(1) of this chapter.

1. Cultures and stocks of infectious agents and associated biologicals, including: cultures from medical and pathological laboratories; cultures and stocks of infectious agents from research and industrial laboratories; wastes from the production of biologicals; discarded live and attenuated vaccines; and culture dishes and devices used to transfer, inoculate, and mix cultures.

2. Human pathological waste, including tissues, organs, and body parts and body fluids that are removed during surgery or autopsy, or other medical procedures, and specimens of body fluids and their containers.

3. Human blood and blood products including:
   (i) Liquid waste human blood;
   (ii) Products of blood;
   (iii) Items saturated and/or dripping with human blood; or
   (iv) Items that were saturated and/or dripping with human blood that are now caked with dried human blood; including serum, plasma, and other blood components, and their containers, which were used or intended for use in either patient care, testing and laboratory analysis or the development of pharmaceuticals. Intravenous bags are also included in this category.

4. Sharps that have been used in animal or human patient care or treatment or in medical, research, or industrial laboratories, including hypodermic needles, syringes (with or without the attached needle), pasteur pipettes, scalpel blades, blood vials, needles with attached tubing, and culture dishes (regardless of presence of infectious agents). Also included are other types of broken or unbroken glassware that were in contact with infectious agents, such as used slides and cover slips.
(5) Animal waste including contaminated animal carcasses, body parts, and bedding of animals that were known to have been exposed to infectious agents during research (including research in veterinary hospitals), production of biologicals or testing of pharmaceuticals.

(6) Isolation wastes including biological waste and discarded materials contaminated with blood, excretions, exudates, or secretions from humans who are isolated to protect others from certain highly communicable diseases, or isolated animals known to be infected with highly communicable diseases.

(7) Unused sharps including the following unused, discarded sharps: hypodermic needles, suture needles, syringes, and scalpel blades.

EMISSIONS/CONTROLS EVALUATION

The emission rates for nitrogen oxides (NOₓ) and carbon monoxide (CO) used in this review were obtained from a stack test performed on a similar incinerator at Rose Hills Co. by World Environmental on March 28, 2013. The emission rate for PM₁₀ used in this review was obtained from a stack test performed on a similar incinerator at Eternal Hills in Oceanside, California on July 7 and July 8, 2011. Emissions of sulfur dioxide (SO₂) were calculated using the emission factor from the Environmental Protection Agency (EPA) document AP-42, *Compilation of Air Pollutant Emission Factors, Fifth Edition*, Section 1.4 *Natural Gas Combustion*, July 1998. Volatile organic compound (VOC) and PM₁₀ emissions were calculated using emission factors from EPA's Factor Information Retrieval Data System (FIRE) SCC 5-02-001-01. The emission factors used in the analysis of HAP and mercury emissions were obtained from FIRE SCC 3-15-021-01. The composite emission factor of HAPs listed in FIRE was 0.076 pounds of HAP per body cremated. Potential emissions of the application represent the potential of the new equipment, assuming continuous operation (8760 hours per year). The following table provides an emissions summary for this project.

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of all criteria pollutants are below de minimis levels.

APPLICABLE REQUIREMENTS

Broder Cremation Service, Inc. shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved. For a complete list of applicable requirements for your installation, please consult your operating permit.

GENERAL REQUIREMENTS

- **Submission of Emission Data, Emission Fees and Process Information**, 10 CSR 10-6.110
  The emission fee is the amount established by the Missouri Air Conservation Commission annually under Missouri Air Law 643.079(1). Submission of an Emissions Inventory Questionnaire (EIQ) is required June 1 for the previous year's emissions.

- **Operating Permits**, 10 CSR 10-6.065

- **Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin**, 10 CSR 10-6.170

- **Restriction of Emission of Visible Air Contaminants**, 10 CSR 10-6.220

- **Restriction of Emission of Odors**, 10 CSR 10-3.0906.165
STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, I recommend this permit be granted with special conditions.

J Luebbert
New Source Review Unit

PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated December 4, 2012, received January 15, 2013, designating Broder Cremation Service, Inc. as the owner and operator of the installation.

Attachment A - Mercury Compliance Worksheet

Broder Cremation Service, Inc.
St. Charles County, LG 291
Project Number: 2013-01-024
Installation ID Number: 183-0248
Permit Number: ________

This sheet covers the period from ________ to ________. (month, year) (month, year)

<table>
<thead>
<tr>
<th>Month</th>
<th>Cremations</th>
<th>Mercury Emission Factor (lbs/body)</th>
<th>¹Monthly PM₁₀ Emissions (lbs)</th>
<th>²12-Month PM₁₀ Emissions (pounds/year)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Example</td>
<td>15</td>
<td>0.00329</td>
<td>0.0494</td>
<td>0.52</td>
</tr>
</tbody>
</table>

Note 1: The Monthly Emissions (lbs) are calculated by multiplying the number of cremations by the Emission Factor (lbs/body).

Note 2: The 12-Month Emissions (lbs/year) are a rolling total calculated by adding the Month’s Emissions (lbs) to the Monthly Emissions (lbs) of the previous eleven (11) months. A total of less than 20.0 lbs in any consecutive 12-month period indicates compliance.

RE: New Source Review Permit - Project Number: 2013-01-024  

Dear Mr. Broder:  

Enclosed with this letter is your permit to construct. Please study it carefully. Also, note the special conditions, if any, on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions, your new source review permit application and with your amended operating permit is necessary for continued compliance. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.  

If you have any questions regarding this permit, please do not hesitate to contact J Luebbert, at the Department’s Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102 or at (573) 751-4817. Thank you for your attention to this matter.  

Sincerely,  

AIR POLLUTION CONTROL PROGRAM  

Susan Heckenkamp  
New Source Review Unit Chief
