MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: 052020-005  Project Number: 2020-02-020
Installation ID: 099-0087

Parent Company: Central Stone Company

Parent Company Address: 4640 East 56th Street, Davenport, IA 52807

Installation Name: Central Stone Co - Antonia Quarry

Installation Address: 3680 Highway M, Antonia, MO 63052

Location Information: Jefferson County, S20 & 21, T42N, R05E

Application for Authority to Construct was made for:
Replacement of primary crusher and installation of additional conveyors, stacker, and surge pile. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required.

☐ Standard Conditions (on reverse) are applicable to this permit.

☐ Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

__________________________
Director or Designee
Department of Natural Resources

__________________________
May 19, 2020
Effective Date
STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Enforcement and Compliance Section of the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Enforcement and Compliance Section of the Department’s Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant sources(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department’s regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of the permit application and this permit and permit review shall be kept at the installation address and shall be made available to Department’s personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant sources(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit using the contact information below.

Contact Information:
Missouri Department of Natural Resources
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102-0176
(573) 751-4817

The regional office information can be found at the following website:
http://dnr.mo.gov/regions/
SITE SPECIFIC SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (3)(E). “Conditions required by permitting authority.”

1. Superseding Condition
   The conditions of this permit supersede Special Condition 1. found in the previously issued construction permit 0699-016 from the Air Pollution Control Program.

2. PM$_{10}$ Emission Limitation
   A. Central Stone Co - Antonia Quarry shall emit less than 15.0 tons of PM$_{10}$ in any consecutive 12-month period from the project equipment (see Table 2 listed in the Project Description). The SSM emissions as reported to the Air Pollution Control Program’s Compliance/Enforcement Section in accordance with the requirements of 10 CSR 10-6.050 Start-Up, Shutdown, and Malfunction Conditions shall be included in the limit.
   
   B. Attachment A or equivalent forms, such as electronic forms, approved by the Air Pollution Control Program shall be used to demonstrate compliance with Special Conditions 2.A.

3. Daily Production Limit
   Central Stone Co - Antonia Quarry shall limit its daily production of rock produced form the “secondary” plant area of this facility based on Table 1 using Attachment B, or another equivalent form, that has been approved by the Air Pollution Control Program, including electronic forms. This includes all equipment located on site before the issuance of this permit.

| a Operation without other plants
| b Operation with plants that are owned by Central Stone Co.

4. Distance to Property Boundary Requirement
   The primary emission point shall be located at least 1,400 feet from the nearest property boundary.

5. Moisture Content Testing Requirement
SITE SPECIFIC SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

A. Central Stone Co - Antonia Quarry shall verify that the moisture content of the processed rock is greater than or equal to 1.5 percent by weight.

B. Testing shall be conducted according to the method prescribed by the American Society for Testing Materials (ASTM) 0-2216, C-566 or another method approved by the Director.

C. The initial test shall be conducted no later than 45 days after the start of operation. A second test shall be performed the calendar year following the initial test during the months of July or August.

D. The test samples shall be taken from rock that has been processed by the plant without the use of water spray or from each source of aggregate (e.g. quarry).

E. The written analytical report shall include the raw data and moisture content of each sample, the test date and the original signature of the individual performing the test. The report shall be filed on-site or at the Central Stone Co - Antonia Quarry main office within 30 days of completion of the required test.

F. If the moisture content of either of the two tests is less than the moisture content in Special Condition 5.A, another test may be performed within 15 days of the noncompliant test. If the results of that test is less than the moisture content in Special Condition 5.A, Central Stone Co - Antonia Quarry shall either:
   1) Apply for a new permit to account for the revised information, or
   2) Submit a plan for the installation of wet spray devices to the Compliance/Enforcement Section of the Air Pollution Control Program within 10 days of the second noncompliant test. Plans may be sent by mail to P.O. Box 176, Jefferson City, MO 65102 or by email at aircompliancereporting@dnr.mo.gov. The wet spray devices shall be installed and operational within 40 days of the second noncompliant test.

6. Documented Haul Road Watering
A. Central Stone Co - Antonia Quarry shall control dust from haul road EU-23B and the distance covered by the pit end loader using water or surfactant spray consistently and correctly at all times to prevent visible fugitive emissions from entering the ambient air beyond the property boundary. The following conditions apply to haul road watering:
   1) The water application rate shall be 100 gallons per 1000 square feet at least once every day.
   2) A quarter inch or more rainfall during the preceding 24 hours shall substitute for one daily water application
   3) Water/surfactant application shall not be required when the ground is frozen or when there will be no traffic on the roads.
SITE SPECIFIC SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

B. Central Stone Co - Antonia Quarry shall keep the following records on file and available for inspection:
   1) A daily log initialed by the responsible facility operator of roads watered and quantity of water/chemical application used, or notation that there was a quarter inch or greater rainfall within the past 24 hours or that the facility was not in operation.
   2) Water tank size, total area of roads to be watered, and the resultant number of fills necessary to accomplish the required application rate.
   3) Records of watering equipment breakdowns and repairs.

7. Record Keeping Requirement
   Central Stone Co - Antonia Quarry shall maintain all records required by this permit for not less than five years and make them available to any Missouri Department of Natural Resources' personnel upon request.

8. Reporting Requirement
   Central Stone Co - Antonia Quarry shall report to the Air Pollution Control Program, Compliance / Enforcement Section by mail to P.O. Box 176, Jefferson City, MO 65102 or by email at AirComplianceReporting@dnr.mo.gov, no later than 10 days after any exceedances of the limitations imposed by this permit.
Central Stone Co - Antonia Quarry: Complete: February 13, 2020
3680 Highway M
Antonia, MO 63052

Parent Company:
Central Stone Company
4640 East 56th Street
Davenport, IA 52807

Jefferson County, S20, T42N, R05E

INSTALLATION/PROJECT DESCRIPTION

Central Stone Company owns and operates a rock crushing plant at Antonia Quarry in Jefferson County. This plant currently consists of three crushers: a primary crusher with a MHDR of 412 tph, a secondary crusher with a MHDR of 412 tph, and a tertiary crusher with a MHDR of 275 tph. A water spray dust suppression system is used on the crusher and screen permitted in permit #0199-006 and conveyors EP26-30. Central Stone Company will continue to operate these spray devices. No other plants are currently operating at Antonia Quarry.

Central Stone Company – Antonia Quarry will be removing their primary crusher and grizzly feeder and replacing them with a new primary crusher (EU-11A) and grizzly feeder (EU-03B), a discharge conveyor, 13 field conveyors, a surge pile stacker, a new surge pile, and a tunnel conveyor (the stacker and all conveyors are all grouped as EU-07A). This will bring the total number of conveyors at the site to 35 (including the stacker). Shot rock from the shot face will be carried by a pit end loader a distance of 300 ft to the new grizzly feeder. The grizzly feeder will have an increased MHDR of 1200 tph and the primary crusher will have an increased MHDR of 900 tph. The remaining 300 tph of rock will bypass the crusher and be directly fed to the crusher discharge conveyor. All of the equipment will be bottlenecked by the daily production limit.

The crushed and uncrushed rock will be conveyed to a surge pile stacker and stored in a new surge pile. From there, it will either be hauled off and sold as is or be conveyed to the existing “secondary” part of the plant to be screened in the primary screen (EP-04). The surge pile will be no larger than 0.3 acres.
As part of this permit, Central Stone Company – Antonia Quarry has been given a 5,000 ton daily production limit for the existing equipment in the “secondary” part of the facility, in anticipation of needing a higher capacity than any other plant that would relocate onsite. A 6,522 ton daily production limit has been given for when Central Stone Company – Antonia Quarry is working solitarily and a 15 ton limit of PM$_{10}$ has been given to the newly permitted equipment (as listed in Table 2).

The new haul road (EU-023B) and the distance covered by the pit end loader from the shot face to the grizzly feeder (EU-03B) will be controlled using documented watering.

Central Stone Company operates this site using line power and no diesel-fueled engines will be operated.

This installation is not on the List of Named Installations found in 10 CSR 10-6.020(3)(B)27. The installation’s major source level is 250 tons per year and the fugitive emissions are not counted toward major source applicability.

This installation is located in Jefferson County, a nonattainment area for the 8-hour ozone standard and the PM-2.5 standard and an attainment area for all other criteria pollutants. Part of Jefferson County is a nonattainment area for lead. The installation is not located in the Jefferson County lead nonattainment area.

Table 4 summarizes the emissions of this project. The existing actual emissions were taken from the previous year's EIQ. The potential emissions of the application represent the emissions of all equipment and activities assuming continuous operation (8760 hours per year). The conditioned potential emissions include emissions from sources that will limit their production to ensure compliance with the daily production limit.

EMISSIONS CALCULATIONS

Emissions for the project were calculated as described below and using emission factors found in the United States EPA document AP-42 Compilation of Air Pollutant Emission Factors, Volume 1: Stationary Point and Area Sources, Fifth Edition (AP-42).

Emissions from the rock-crushing equipment:
- The controlled emission factors were used because the equipment is controlled by water spray devices and because the inherent moisture content of the crushed rock is greater than 1.5% by weight.

Emissions from aggregate handling:
- The controlled emission factors were used because the inherent moisture content of the crushed rock is greater than 1.5% by weight.

Emissions from haul roads and vehicular activity areas:
- Calculated using the predictive equation from AP-42 Section 13.2.2 "Unpaved

- A 90% control efficiency for PM and PM$_{10}$ and a 74% control efficiency for PM$_{2.5}$ were applied to the emission calculations for the use of BMPs.

Emissions from storage piles:

- Load-in and load-out of storage piles were calculated using the predictive equation from AP-42 Section 13.2.4 “Aggregate Handling and Storage Piles,” November 2006.
- Emissions from wind erosion of storage piles were calculated using an equation found in the Air Pollution Control Program’s Emissions Inventory Questionnaire Form 2.8 “Storage Pile Worksheet.”

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of PM$_{10}$ are conditioned below de minimis levels due to the daily production limit. Potential emissions of PM are above de minimis levels, but below major levels.

APPLICABLE REQUIREMENTS

Central Stone Co - Antonia Quarry shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved.

GENERAL REQUIREMENTS

- Submission of Emission Data, Emission Fees and Process Information, 10 CSR 10-6.110.

- No Operating Permit is required for this installation.

- Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin, 10 CSR 10-6.170

- Restriction of Emission of Visible Air Contaminants, 10 CSR 10-6.220

- Restriction of Emission of Odors, 10 CSR 10-6.165

SPECIFIC REQUIREMENTS

- 40 CFR 60 Subpart OOO, "Standards of Performance for Nonmetallic Mineral
Processing Plants” applies to the equipment.

- None of the National Emission Standards for Hazardous Air Pollutants (NESHAPS) or National Emission Standards for Hazardous Air Pollutants for Source Categories (MACTS) apply to the proposed equipment.

**STAFF RECOMMENDATION**

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, it is recommended that this permit be granted with special conditions.

**PERMIT DOCUMENTS**

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated February 10, 2020, received February 13, 2020, designating Central Stone Company as the owner and operator of the installation

Same & Separate = the rock crushing plant operating concurrently with other plants owned and not owned by Central Stone Co.  

²Input of actual production for the corresponding date  

³Input the daily production limit for operating scenario.  
During solitary operation, the rock crushing plant's production is limited to 6,522 tons of rock per day.  
During same owner operation, the rock crushing plant's production is limited to 5,000 tons of rock per day.
Attachment AA: Best Management Practices

Haul roads and vehicular activity areas shall be maintained in accordance with at least one of the following options when the portable plant is operating.

1. **Pavement**
   A. The operator shall pave the area with materials such as asphalt, concrete or other materials approved by the Air Pollution Control Program. The pavement will be applied in accordance with industry standards to achieve control of fugitive emissions\(^1\) while the plant is operating.
   B. Maintenance and repair of the road surface will be conducted as necessary to ensure that the physical integrity of the pavement is adequate to achieve control of fugitive emissions from these areas while the plant is operating.
   C. The operator shall periodically wash or otherwise clean all of the paved portions of the haul roads as necessary to achieve control of fugitive emissions from these areas while the plant is operating.

2. **Application of Chemical Dust Suppressants**
   A. The operator shall apply a chemical dust suppressant (such as magnesium chloride, calcium chloride, lignosulfonates, etc.) to unpaved areas.
   B. The quantities of the chemical dust suppressant shall be applied and maintained in accordance with the manufacturer’s recommendation (if available) and in sufficient quantities to achieve control of fugitive emissions from these areas while the plant is operating.
   C. The operator shall record the time, date and the amount of material applied for each application of the chemical dust suppressant agent on the above areas. The operator shall keep these records with the plant for not less than five (5) years and make these records available to Department of Natural Resources’ personnel upon request.

3. **Application of Water-Documented Daily**
   A. The operator shall apply water to unpaved areas. Water shall be applied at a rate of 100 gallons per day per 1,000 square feet of unpaved or untreated surface area while the plant is operating.
   B. Precipitation may be substituted for watering if the precipitation is greater than one quarter of one inch and is sufficient to control fugitive emissions.
   C. Watering may also be suspended when the ground is frozen, during periods of freezing conditions when watering would be inadvisable for traffic safety reasons, or when there will be no traffic on the roads.
   D. The operator shall record the date and volume of water application or the amount of precipitation that day. The operators shall also record the rational for not watering (e.g. freezing conditions or not operating).
   E. The operator shall keep these records with the plant for not less than five (5) years, and the operator shall make these records available to Department of Natural Resources’ personnel upon request.

---

\(^1\) For purposes of this document, Control of Fugitive Emissions means to control particulate matter that is not collected by a capture system and visible emissions to the extent necessary to prevent violations of the air pollution law or regulation. (Note: control of visible emission is not the only factor to consider in protection of ambient air quality.)

RE: New Source Review Permit - Project Number: 2020-02-020

Dear John F. Brimeyer:

Enclosed with this letter is your permit to construct. Please study it carefully and refer to Appendix A for a list of common abbreviations and acronyms used in the permit. Also, note the special conditions on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions and your new source review permit application are necessary for continued compliance. In addition, please note that Central Stone Co - Antonia Quarry cannot operate with any other plants that have ambient impact limits based on the Air Pollution Control Program’s nomographs. Please refer to the permits of any plant that you are operating with to see if their respective permits contain an ambient impact limit. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.

This permit may include requirements with which you may not be familiar. If you would like the department to meet with you to discuss how to understand and satisfy the requirements contained in this permit, an appointment referred to as a Compliance Assistance Visit (CAV) can be set up with you. To request a CAV, please contact your local regional office or fill out an online request. The regional office contact information can be found at the following website: http://dnr.mo.gov/regions/. The online CAV request can be found at http://dnr.mo.gov/cav/compliance.htm.

If you were adversely affected by this permit decision, you may be entitled to pursue an appeal before the administrative hearing commission pursuant to Sections 621.250 and 643.075.6 RSMo. To appeal, you must file a petition with the administrative hearing commission within thirty days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed; if it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the administrative hearing commission,
whose contact information is: Administrative Hearing Commission, United States Post Office Building, 131 West High Street, Third Floor, P.O. Box 1557, Jefferson City, Missouri 65102, phone: 573-751-2422, fax: 573-751-5018, website: www.oa.mo.gov/ahc.

If you have any questions regarding this permit, please do not hesitate to contact Dakota Fox at the department’s Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102 or at (573) 751-4817. Thank you for your attention to this matter.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Susan Heckenkamp
New Source Review Unit Chief
