RE: New Source Review Permit Amendment - Permit Number: 082018-012A
Project Number: 2018-09-012; Installation Number: 095-0065

Dear Mr. Griffin:

The Air Pollution Control Program has received your September 13, 2018 request to amend Attachments E and F of construction permit 082018-012 to reflect the intent of special condition 4 for the usage of alternative materials. The special condition allows for the use of alternative materials and requires the emissions of all alternative materials to be included in the compliance demonstrations for the plant wide emission limitations of volatile organic compounds (VOC) and hazardous air pollutants (HAPs). This amendment revises the Attachments to reflect the intent of the special condition. This revised Attachment E replaces both Attachments E and F of Permit 082018-012.

If you were adversely affected by this permit decision, you may be entitled to pursue an appeal before the administrative hearing commission pursuant to Sections 621.250 and 643.075.6 RSMo. To appeal, you must file a petition with the administrative hearing commission within thirty days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed; if it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the

Attachment E – Alternative Material VOC and HAPs Worksheet

Gateway Packaging Company, LLC
 Jackson County, S1, T49N, R33W
 Project Number: 2018-03-002
 Installation ID Number: 095-0065
 Permit Number: 082018-012A

Table 1: New Material Identification

A	B	C	D	E	F
Date	New Material Name	HAP Name or Group and CAS # ⁴⁵	HAP Content (Weight %) ⁴⁶	VOC Name and CAS # ⁴⁷	VOC Content (Weight %) ⁴⁸

⁴⁵ Compare ingredient names and CAS to the Air Pollution Control Program Table of Hazardous Air Pollutants, Screening Model Action Levels, for confirmation as a HAP. If the HAP is indicated as a particulate HAP on the Table, do not record on this sheet. It is not expected that particulate HAPs will contribute emissions from presses and adhesives. If the HAP belongs to an aggregate group, record the name of the aggregate group; if it does not belong to an aggregate group, record the name of the individual HAP.

⁴⁶ If HAP content has a range, then use the highest value.

⁴⁷ Record the name of each material used that contains a VOC as defined in 10 CSR 10-6.020.

⁴⁸ If VOC content has a range, then use the highest value.
