MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: 072020-009  Project Number: 2020-03-036
Installation Number: 147-0023

Parent Company: Kawasaki Heavy Industries Ltd.

Parent Company Address: 1-1 Kawasaki-Cho, Akashi, Japan

Installation Name: Kawasaki Motors Manufacturing Corp.

Installation Address: #1 Horsepower Dr., Maryville, MO 64468

Location Information: Nodaway County, S31, T64N, R35W

Application for Authority to Construct was made for:
Installation of Assembly Line 14 (AET14) and the addition of two run up stands each for Assembly Lines 2, 3, and 5 (AET2,3,5). This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required.

☐ Standard Conditions (on reverse) are applicable to this permit.

☐ Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

––––––––––––––––––––

Kendall B. Hech
Director or Designee
Department of Natural Resources

July 21, 2020
Effective Date
STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Enforcement and Compliance Section of the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Enforcement and Compliance Section of the Department’s Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant source(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department’s regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of the permit application and this permit and permit review shall be kept at the installation address and shall be made available to Department’s personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant source(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit using the contact information below.

Contact Information:
Missouri Department of Natural Resources
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102-0176
(573) 751-4817

The regional office information can be found at the following website:
http://dnr.mo.gov/regions/
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted to the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (3)(E). “Conditions required by permitting authority.”

Kawasaki Motors Manufacturing Corp.
Nodaway County, S31, T64N, R35W

1. Superseding Condition
The conditions of this permit supersede Special Condition 2 found in the previously issued construction permit 012018-004 issued by the Air Pollution Control Program.

2. Emission Limitations – Installation
A. Kawasaki Motors Manufacturing Corporation shall emit less than 250.0 tons of VOCs from the entire installation in any consecutive 12-month period.

B. Kawasaki Motors Manufacturing Corporation shall emit less than the SMAL or 10.0 tons individually and 25.0 tons combined of HAPs from the entire installation in any consecutive 12-month period.

C. Kawasaki Motors Manufacturing Corporation shall emit less than 250.0 tons of CO from the entire installation in any consecutive 12-month period.

D. Kawasaki Motors Manufacturing Corporation must determine the total amount of VOC, HAPs and CO emitted from the installation. Attachment A and B or equivalent forms approved by the Air Pollution Control Program shall be used to calculate emission associated with this project. These project emissions shall be added to the installation emissions from Attachments E through G of OP2015-038A and Attachments A through C of Construction Permit 012018-004, or shall be included in equivalent approved forms in order to demonstrate compliance with Special Conditions 2.A, 2.B and 2.C.

E. Kawasaki Motors Manufacturing Corporation shall maintain records of:
   1) Safety Data Sheets (SDS) for all materials used at the installation;
   2) Flux manufacturer’s declarations of flux fluorides binding to dross for all fluxes used (i.e. sf350, sf206 and COVERAL 777).
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

3. Record Keeping and Reporting Requirements
   A. Kawasaki Motors Manufacturing Corp. shall maintain all records required by this permit for not less than five years and shall make them available immediately to any Missouri Department of Natural Resources’ personnel upon request. These records shall include SDS for all materials used.

   B. Kawasaki Motors Manufacturing Corp. shall report to the Air Pollution Control Program’s Compliance/Enforcement Section, by mail at P.O. Box 176, Jefferson City, MO 65102 or by email at AirComplianceReporting@dnr.mo.gov, no later than 10 days after the end of the month during which any record required by this permit shows an exceedance of a limitation imposed by this permit.
REVIEW OF APPLICATION FOR AUTHORITY TO CONSTRUCT AND OPERATE
SECTION (5) REVIEW
Project Number: 2020-03-036
Installation ID Number: 147-0023
Permit Number: 072020-009

Installation Address:
Kawasaki Motors Manufacturing Corp.
#1 Horsepower Dr.
Maryville, MO 64468

Parent Company:
Kawasaki Heavy Industries Ltd.
1-1 Kawasaki-Cho
Akashi, Japan

Nodaway County, S31, T64N, R35W

REVIEW SUMMARY

- Kawasaki Motors Manufacturing Corp. has applied for authority to install Assembly Line 14 (AET14) and add two run up stands each for Assembly Lines 2, 3, and 5 (AET2,3,5).

- The application was deemed complete on March 20, 2020.

- No HAP emissions are expected from the proposed equipment.

- None of the New Source Performance Standards (NSPS) apply to the project.

- None of the NESHAPs apply to this installation. None of the currently promulgated MACT regulations apply to the proposed equipment.

- No air pollution control equipment is being used in association with the new equipment.

- This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of all pollutants are below de minimis levels.

- This installation is located in Nodaway County, an attainment/unclassifiable area for all criteria pollutants.

- This installation is not on the List of Named Installations found in 10 CSR 10-6.020(3)(B), Table 2. The installation's major source level is 250 tons per year and fugitive emissions are not counted toward major source applicability.

- Ambient air quality modeling was not performed since potential emissions of the application are below de minimis levels.
• Emissions testing is not required for the equipment as a part of this permit. Testing may be required as part of other state, federal or applicable rules.

• A Part 70 Operating Permit modification is required for this installation within 1 year of commencement of operations.

• Approval of this permit is recommended with special conditions.

INSTALLATION DESCRIPTION

Kawasaki Motors Manufacturing Corporation operates a gasoline engine manufacturing installation in Maryville, Missouri, (Nodaway County). Kawasaki Motors builds engines ranging from 4.5 horsepower (hp) up to 35.0 hp. These engines are primarily used in walk-behind lawn mowers, riding lawn mowers and all-terrain vehicles.

Kawasaki Motors Manufacturing Corporation is not considered an existing major source for construction permitting because of the 250-ton annual limit for applicable pollutants. For New Source Review purposes, it is considered a minor source. The installation holds a Part 70 State Operating Permit most recently renewed in permit OP2015-038. A new Part 70 State Operating Permit renewal (Project Number 2020-04-035) is currently in progress.

The following projects for Kawasaki Motors Manufacturing Corporation have been processed by the Air Pollution Control Program.

</table>
Kawasaki Motors Manufacturing Company proposes to install a new assembly line, identified as Assembly Line 14 (AET14). The MHDR for Assembly Line 14 will be 81 engines per hour. There are two main sources of air emissions from the new assembly line (AET14): the combustion of gasoline in the run up test stands, and the use of brakewash for cleaning the engines. The new assembly line will operate in a similar fashion to the existing lines. The engine runs while the RPM and idle adjustments are made. The engine is shut off and the oil and gasoline are drained out of the engine. The engine then goes on down the line to packaging area to be boxed for shipment.

Kawasaki Motors Manufacturing Company also propose to add two run up stands each for existing Assembly Lines 2, 3, and 5 (AET2,3,5). This will increase the engine testing MHDR by an additional 22 engines per hour for a total of 112 engines per hour each for Assembly Lines 2, 3, and 5. As confirmed by the applicant, the addition of these run up stands will have very little to no increase in brakewash fluid. The extension of these lines are designed for the installation to run long blocks. These are engines that are basically incomplete. Very little brakewash is used in this process and it would be too minimal to record.

The total emissions for this project are below de minimis levels but above the insignificant levels for CO and VOC, thus requiring a permit. The emissions come from the engine testing and the brakewash fluid. No controls are associated with these units.

EMISSIONS/CONTROLS EVALUATION

The potential emissions from the test stands were calculated using the emission factors for gasoline engine testing taken from AIRS Facility Subsystem Source Classification Codes and Emission Factor Listing for Criteria Air Pollutants (March 1990). The PTE for gasoline usage at the test stands was calculated at 0.025 gal/engine of unleaded fuel. The assembled motors use just enough fuel to get the motor running before they are shut down; therefore the size of the motor does not greatly affect fuel usage.

Mass balance analysis and the Safety Data Sheet were used when calculating the PTE of the brakewash fluid used in Assembly Line 14. It was determined that 2.1 oz. of brakewash fluid was used per engine. As stated in the SDS, the fluid had a 100% VOC weight content and no HAPs.

Table 3 provides an emissions summary for this project. Existing potential emissions were taken from emission limits established in NSR Permit 012018-004. Existing actual emissions were taken from the installation’s 2019 EIQ. Potential emissions of the application represent the potential of the new equipment and modified equipment, assuming continuous operation (8760 hours per year).

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Potential emissions of all pollutants are below de minimis levels.
APPLICABLE REQUIREMENTS

Kawasaki Motors Manufacturing Corp. shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved. For a complete list of applicable requirements for your installation, please consult your operating permit.

GENERAL REQUIREMENTS

- **Operating Permits**, 10 CSR 10-6.065
- **Start-Up, Shutdown, and Malfunction Conditions**, 10 CSR 10-6.050
- **Submission of Emission Data, Emission Fees and Process Information**, 10 CSR 10-6.110
  - Per 10 CSR 10-6.110(4)(B)2.B(II) and (4)(B)2.C(II) a full EIQ is required every year for Part 70 installations.
- **Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin**, 10 CSR 10-6.170
- **Restriction of Emission of Visible Air Contaminants**, 10 CSR 10-6.220
- **Restriction of Emission of Odors**, 10 CSR 10-6.165

STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, **Construction Permits Required**, it is recommended that this permit be granted with special conditions.

PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated March 20, 2020, received March 20, 2020, designating Kawasaki Heavy Industries Ltd. as the owner and operator of the installation.
- Brakewash Fluid Safety Data Sheet.

RE: New Source Review Permit - Project Number: 2020-03-036

Dear Todd Turner:

Enclosed with this letter is your permit to construct. Please study it carefully and refer to Appendix A for a list of common abbreviations and acronyms used in the permit. Also, note the special conditions on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions, your new source review permit application and with your amended operating permit is necessary for continued compliance. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.

This permit may include requirements with which you may not be familiar. If you would like the department to meet with you to discuss how to understand and satisfy the requirements contained in this permit, an appointment referred to as a Compliance Assistance Visit (CAV) can be set up with you. To request a CAV, please contact your local regional office or fill out an online request. The regional office contact information can be found at the following website: http://dnr.mo.gov/regions/. The online CAV request can be found at http://dnr.mo.gov/cav/compliance.htm.

If you were adversely affected by this permit decision, you may be entitled to pursue an appeal before the administrative hearing commission pursuant to Sections 621.250 and 643.075.6 RSMo. To appeal, you must file a petition with the administrative hearing commission within thirty days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed; if it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the administrative hearing commission, whose contact information is: Administrative Hearing Commission, United States Post Office Building, 131 West High Street, Third Floor, P.O. Box 1557, Jefferson City, Missouri 65102, phone: 573-751-2422, fax: 573-751-5018, website: www.oa.mo.gov/ahc.
If you have any questions regarding this permit, please do not hesitate to contact Jonathan Halla, at the Department of Natural Resources’ Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102 or at (573) 751-4817. Thank you for your attention to this matter.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Susan Heckenkamp
New Source Review Unit Chief
