STACK INSTALLATION INSTRUCTIONS

1. Apply a 1/2" thick mortar joint to exposed refractory surface, and fasten with hardware provided. No more than (2) stack sections shall be lifted together. Repeat process for remaining stack sections. If sections of varying lengths are supplied, assemble as to avoid flanges & lifting eyes interfering with rain collar location.
2. Install storm collar on stack, 3" [76 mm] above non-combustible liner (flashing), allowing for proper ventilation (see detail).
3. Apply a 1/4" [6 mm] bead of high-temperature silicon sealant (provided by MCD) to the joint between the storm collar (C) and the stack (B).
4. Storm collar is furnished by MCD. The non-combustible liner (flashing) to be provided by the others.
5. If fifty percent of the stack length is above the roof, guy wires may be required. Consult with your MCD rep.
6. Rain cap not required.
