PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: 082016-011
Project Number: 2016-04-015
Installation Number: 021-0262

Parent Company: Sealed Air Corporation
Parent Company Address: 100 Rodgers Bridge Road, Duncan, SC 29334
Installation Name: Sealed Air Corporation
Installation Address: 2015 SW Lower Lake Road, St. Joseph, MO 64504
Location Information: Buchanan County, S25, T57N, R36W

Application for Authority to Construct was made for:

Installation of new printing and laminating equipment. This review was conducted in accordance with Section (6), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required.

☐ Standard Conditions (on reverse) are applicable to this permit.
☑ Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

Prepared by
Chia-Wei Young
New Source Review Unit

Director or Designee
Department of Natural Resources
AUG 25 2016
Effective Date
STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Enforcement and Compliance Section of the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Enforcement and Compliance Section of the Department’s Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant sources(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department’s regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of the permit application and this permit and permit review shall be kept at the installation address and shall be made available to Department’s personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant sources(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit using the contact information below.

Contact Information:
Missouri Department of Natural Resources
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102-0176
(573) 751-4817

The regional office information can be found at the following website:
http://dnr.mo.gov/regions/
SPECIAL CONDITIONS:
The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (12)(A)10. “Conditions required by permitting authority.”

Sealed Air Corporation
Buchanan County, S25, T57N, R36W

1. Superseding Condition
   The conditions of this permit supersede all special conditions found in the previously issued construction permit 0492-011 issued by the Air Pollution Control Program.

2. Control Device Requirement – Regenerative Thermal Oxidizer (RTO)
   A. Sealed Air Corporation shall control emissions from the W & H Vistaflex CL10 Flexo Printing Press (Press #1, EP18) and the Nordmeccanica laminator (EP21) using an RTO as specified in the permit application.
   B. The RTO shall be operated and maintained in accordance with the manufacturer’s specifications. A copy of the manufacturer’s specifications shall be kept on-site.
   C. The combustion zone temperature of the RTO shall be continuously monitored and recorded during operations. The operating temperature of the RTO shall be maintained at no less than 1,600 °F, or lower temperature that source testing has demonstrated can achieve 98% destruction efficiency, based on a three-hour rolling average. The monitoring equipment shall be located such that the Department of Natural Resources personnel may easily observe them.
   D. Sealed Air Corporation shall maintain an operating and maintenance log for the RTO which shall include the following:
      1) Incidents of malfunction, with impact on emissions, duration of event, probable cause, and corrective actions; and
      2) Maintenance activities, with inspection schedule, repair actions, and replacements, etc.

3. Record Keeping and Reporting Requirements
   A. Sealed Air Corporation shall maintain all records required by this permit for not less than five years and shall make them available immediately to any Missouri Department of Natural Resources’ personnel upon request. These records shall include SDS for all materials used.
   B. Sealed Air Corporation shall report to the Air Pollution Control Program’s Compliance/Enforcement Section, P.O. Box 176, Jefferson City, MO 65102, no later than 10 days after the end of the month during which any record required by this permit shows an exceedance of a limitation imposed by this permit.
REVIEWS OF APPLICATION FOR AUTHORITY TO CONSTRUCT AND OPERATE
SECTION (6) REVIEW
Project Number: 2016-04-015
Installation ID Number: 021-0082
Permit Number:

Installation Address: Sealed Air Corporation
Sealed Air Corporation
2015 SW Lower Lake Road
St. Joseph, MO 64504

Parent Company: Sealed Air Corporation
100 Rodgers Bridge Road
Duncan, SC 29334

Buchanan County, S25, T57N, R36W

REVIEW SUMMARY

- Sealed Air Corporation has applied for authority to install new printing and laminating equipment and to expand its extrusion capacity.

- The application was deemed complete on April 8, 2016.

- HAP emissions are expected from the proposed equipment. HAPs of concern from this process are products of combustion and extrusion. The HAPs emissions increase from this project are expected to be less than their respective SMAL.

- 40 CFR Part 60, Subpart QQ, Standards of Performance for the Graphic Arts Industry: Publication Rotogravure Printing, of the NSPS applies to the rotogravure coating trolley that is part of the laminator (EP15).

- None of the NESHAPs apply to this installation. None of the currently promulgated MACT regulations apply to the proposed equipment.

- A Regenerative Thermal Oxidizer (RTO) is being used to control the VOC emissions from the equipment in this permit.

- This review was conducted in accordance with Section (6) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of VOC are above de minimis levels.

- This installation is located in Buchanan County, an attainment area for all criteria pollutants.

- This installation is not on the List of Named Installations found in 10 CSR 10-6.020(3)(B), Table 2. The installation's major source level is 250 tons per year and fugitive emissions are not counted toward major source applicability.

- Ambient air quality modeling was not performed for this review. No model is currently available which can accurately predict ambient ozone concentrations caused by this
- installation's VOC emissions.

- Emissions testing is not required for the equipment as a part of this permit. Testing may be required as part of other state, federal or applicable rules.

- A Basic Operating Permit application is required for this installation within 30 days of equipment startup.

- Approval of this permit is recommended with special conditions.

INSTALLATION DESCRIPTION

Sealed Air Corporation owns and operates a facility producing extruded plastic film for the meat packing industry in St. Joseph. At the installation, polyolefin resins in pellet form are stored in silos or Gaylord boxes until ready for use. The resins are then conveyed to the extrusion line, which melts the resins at set formulations. The resins are then forced into a die, which shapes the polymer into film that is hardened by cooling and then wound in sheet form onto a core. Four extrusion lines have corona treaters for pre-treating the sheets. The roll is then sent to a slitting process, whereby the roll is unwound, passed through a series of tension rollers, then cut with knife blades. The material is then wound onto additional cores, wrapped in protective covering and shipped to customers. There are currently six lines, with two other lines under construction, with a total of 48 extruders with a total capacity of 47 million pounds.

The facility was previously owned by Schurpack, Inc. While owned by Schurpack, Inc., the facility had potential emissions of VOC greater than the de minimis level of 40 tpy, according to permit 0492-011 issued in March, 1992. However, since then, the facility had eliminated some equipment. In 2004, the operating permit unit of the Missouri Air Pollution Control program performed a potential emissions analysis which indicated that the facility has emissions less than de minimis for all pollutants. In this determination, the space heaters and the extrusion equipment were not included. Therefore, for this project, the PTE of the equipment currently at the installation were recalculated and the results show that the PTE of all emissions to be less than the de minimis levels. The equipment that was included in the analysis is given below in Table 1.

</table>

Before this project, the installation did not need to apply for an operating permit because its emissions are less than de minimis levels and no federal regulations (i.e. NSPS, MACT, NESHAP, etc.) apply. However, after this project, the facility will be required to apply for a Basic Operating Permit because its VOC emissions are greater than the de minimis level but still below major source level and NSPS Subpart QQ, Standards of Performance for the Graphic Arts Industry: Publication Rotogravure Printing, applies to the coating trolley.

The following New Source Review permits have been issued to Sealed Air Corporation from the Air Pollution Control Program.

The addition of the equipment will increase the extrusion capacity of the plant from 47 million pounds per year to 69.5 million pounds per year. Therefore, the emissions increase from debottlenecking of the extrusion equipment was included in this project as well.

EMISSIONS/CONTROLS EVALUATION

VOC emissions from the storage tanks were calculated using the EPA program TANKS 4.0.9d. Emissions from natural gas combustion were calculated using emission factors from EPA document AP-42, *Compilation of Air Pollutant Emission Factors, Volume 1: Stationary Point and Area Sources, 5th Edition, Chapter 1.4, Natural Gas Combustion, 7/1998.* VOC emissions from the printing press were calculated from mass balances assuming that all of the VOC in the ink are emitted and applying a 98% control efficiency for the RTO, which is a common value used by the Missouri Air Pollution Control Program. The vendor also guarantees a 100% capture efficiency due to the design of the capture system. The facility uses a floor sweeper and a hood over the oven to capture emissions. The ink pail area has a total enclosure around the ink pump and pails. However, in the EPA document, “Control Techniques Guidelines for Flexible Package Printing,” September 2006 (EP453/R-06-003), similar capture systems are suggested to have capture efficiency up to 90%. Therefore, a value of 90% was used as the capture efficiency for the printing press.

VOC emissions from the laminator were calculated from mass balances assuming that all of the VOC in the solvent are being emitted. The facility uses mostly solventless laminations and the solvent will only be run sparingly. However, the VOC emissions calculation was performed assuming that only solvent laminations will be used because it yields the most conservative estimate. 100% was given for capture efficiency because the laminator has a total enclosure surrounding the solvent trolley and the two overhead dryers have a 15% negative pressure to prevent any solvent vapors from escaping. The RTO was given a 98% control efficiency.

VOC emissions from the Cyrel Fast Platemaker were calculated using an emission factor of 0.01 pounds per square foot (lb/ft²). This is an emission factor obtained from the plate manufacturer through mass balance calculations and has been approved for use in previous permits to calculate VOC emissions from Cyrel Fast Platemakers. HAP emissions from the Cyrel Fast Platemakers were calculated using the HAP contents in the SDS and assuming that the same percentage occurs in the VOCs. Methylenebis(4-phenyl isocyanate) (MDI) emissions from the laminator were estimated using the equation for adhesives in “EDI Emissions Reporting Guidelines for the Polyurethane Industry” from the Center for the Polyurethanes Industry.
Potential emissions of ozone from the corona treaters were calculated using an emission factor of 0.073 pounds per kilowatt hour, a value supplied by the applicant and has been approved for use in previous permits issued by the Missouri Air Pollution Control Program. Ozone is a regulated pollutant that has an ambient air quality standard but no regulatory de minimis level. However, it is typically considered a secondary pollutant that forms from VOC and NOX. Ozone was the only pollutant considered from the corona treaters.

VOC emissions from the extrusion process were calculated using emission factors from the paper “Development for Emission Factors for Polyethylene Processing,” 1996. Emission factors were developed for the use of low density polyethylene (LDPE), linear low density polyethylene (LLDPE), and high density polyethylene (HDPE). LDPE generated the highest level of VOC emissions, so it was assumed that LDPE was exclusively used by the extrusion process. Particulate emissions were also calculated using the emission factors for LDPE from the same paper.

The following table provides an emissions summary for this project. Existing potential emissions were calculated during the review for this project. Existing actual emissions were not determined because the facility has not submitted an EIQ since 2006. Potential emissions of the application represent the potential of the new equipment assuming continuous operation (8760 hours per year).

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (6) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of VOC are above de minimis levels.

APPLICABLE REQUIREMENTS

Sealed Air Corporation shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved. For a complete list of applicable requirements for your installation, please consult your operating permit.

GENERAL REQUIREMENTS

- Submission of Emission Data, Emission Fees and Process Information, 10 CSR 10-6.110
  - Per 10 CSR 10-6.110(4)(B)2.B(II) and (4)(B)2.C(II) a full EIQ is required for the first full calendar year the equipment (or modifications) approved by this permit are in operation.

- Operating Permits, 10 CSR 10-6.065

- Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin, 10 CSR 10-6.170

- Restriction of Emission of Visible Air Contaminants, 10 CSR 10-6.220

- Restriction of Emission of Odors, 10 CSR 10-6.165

SPECIFIC REQUIREMENTS

- NSPS Regulations, 10 CSR 10-6.070
  - Standards of Performance for the Graphic Arts Industry: Publication Rotogravure Printing, 40 CFR Part 60, Subpart QQ

STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (6), Missouri State Rule 10 CSR 10-6.060, Construction Permits Required, it is recommended that this permit be granted with special conditions.
PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated April 6, 2016, received April 8, 2015, designating Sealed Air Corporation as the owner and operator of the installation.
APPENDIX A
Abbreviations and Acronyms

% .......... percent
°F .......... degrees Fahrenheit
acfm ...... actual cubic feet per minute
BACT ..... Best Available Control Technology
BMPs ..... Best Management Practices
Btu........ British thermal unit
CAM ...... Compliance Assurance Monitoring
CAS ....... Chemical Abstracts Service
CEMS ..... Continuous Emission Monitor System
CFR ........ Code of Federal Regulations
CO .......... carbon monoxide
CO₂ ........ carbon dioxide
CO₂e ...... carbon dioxide equivalent
COMS ..... Continuous Opacity Monitoring System
CSR........ Code of State Regulations
dscf ...... dry standard cubic feet
EIQ ........ Emission Inventory Questionnaire
EP .......... Emission Point
EPA ....... Environmental Protection Agency
EU ......... Emission Unit
fps ...... feet per second
ft ............ feet
GACT ..... Generally Available Control Technology
GHG ...... Greenhouse Gas
gpm ...... gallons per minute
gr .......... grains
GWP ...... Global Warming Potential
HAP ...... Hazardous Air Pollutant
hr .......... hour
hp .......... horsepower
lb .......... pound
lbs/hr ...... pounds per hour
MACT ..... Maximum Achievable Control Technology
µg/m³ .... micrograms per cubic meter
m/s ........ meters per second
Mgal ...... 1,000 gallons
MW .......... megawatt
MHDR ...... maximum hourly design rate
MMBtu .... Million British thermal units
MMCF ...... million cubic feet
MSDS ...... Material Safety Data Sheet
NAAQS ... National Ambient Air Quality Standards
NESHAPs National Emissions Standards for Hazardous Air Pollutants
NOₓ ......... nitrogen oxides
NSPS ...... New Source Performance Standards
NSR ....... New Source Review
PM ........ particulate matter
PM₂.₅ ...... particulate matter less than 2.5 microns in aerodynamic diameter
PM₁₀ ...... particulate matter less than 10 microns in aerodynamic diameter
ppm ...... parts per million
PSD ....... Prevention of Significant Deterioration
PTE .......... potential to emit
RACT ...... Reasonable Available Control Technology
RAL ........ Risk Assessment Level
SIC ....... Standard Industrial Classification
SIP ......... State Implementation Plan
SMAL .... Screening Model Action Levels
SOₓ ......... sulfur oxides
SO₂ ....... sulfur dioxide
tph ........ tons per hour
tpy ........ tons per year

RE: New Source Review Permit - Project Number: 2016-04-015

Dear Mr. Dover:

Enclosed with this letter is your permit to construct. Please study it carefully and refer to Appendix A for a list of common abbreviations and acronyms used in the permit. Also, note the special conditions, if any, on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions, your new source review permit application and with your amended operating permit is necessary for continued compliance. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.

This permit may include requirements with which you may not be familiar. If you would like the department to meet with you to discuss how to understand and satisfy the requirements contained in this permit, an appointment referred to as a Compliance Assistance Visit (CAV) can be set up with you. To request a CAV, please contact your local regional office or fill out an online request. The regional office contact information can be found at the following website: http://dnr.mo.gov/regions/. The online CAV request can be found at http://dnr.mo.gov/cav/compliance.htm.

If you were adversely affected by this permit decision, you may be entitled to pursue an appeal before the administrative hearing commission pursuant to Sections 621.250 and 643.075.6 RSMo. To appeal, you must file a petition with the administrative hearing commission within thirty days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed; if it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the administrative hearing commission, whose contact information is: Administrative Hearing Commission, United States Post Office Building, 131 West High Street, Third Floor, P.O. Box 1557, Jefferson City, Missouri 65102, phone: 573-751-2422, fax: 573-751-5018, website: www.oa.mo.gov/ahc.
If you have any questions regarding this permit, please do not hesitate to contact Chia-Wei Young, at the Department of Natural Resources’ Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102 or at (573) 751-4817. Thank you for your attention to this matter.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Susan Heckenkamp
New Source Review Unit Chief
