

MISSOURI
DEPARTMENT OF
NATURAL RESOURCES

MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: **06 2 0 1 9 - 0 1 1** Project Number: 2019-03-058
Installation Number: 207-0019

Parent Company: W. W. Wood Products, Inc.

Parent Company Address: 12140 Main Street, Dudley, MO 63936

Installation Name: W. W. Wood Products, Inc.

Installation Address: 12140 Main Street, Dudley, MO 63936

Location Information: Stoddard County, S21, T25N, R9E

Application for Authority to Construct was made for:

Installation of a new automatic finishing line to coat wood cabinet parts. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*.

-
- Standard Conditions (on reverse) are applicable to this permit.
- Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

Director or Designee
Department of Natural Resources

JUN 1 8 2019

Effective Date

STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Enforcement and Compliance Section of the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Enforcement and Compliance Section of the Department's Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant source(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department's regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of the permit application and this permit and permit review shall be kept at the installation address and shall be made available to Department's personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant source(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit using the contact information below.

Contact Information:

Missouri Department of Natural Resources
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102-0176
(573) 751-4817

The regional office information can be found at the following website:

<http://dnr.mo.gov/regions/>

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted to the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (3)(E). "Conditions required by permitting authority."

W. W. Wood Products, Inc.
Stoddard County, S21, T25N, R9E

1. VOC Emission Limitation

A. W. W. Wood Products, Inc. shall emit less than 40.0 tons of VOCs in any consecutive 12-month period from the automatic finishing line (EP-A121).

B. W. W. Wood Products, Inc. shall develop and use forms to demonstrate compliance with Special Condition 1.A. The forms shall contain, at a minimum, the following information.

- 1) Installation name
- 2) Installation ID
- 3) Permit number
- 4) Current month
- 5) Current 12-Month date range
- 6) Specific coatings used by the automatic finishing line
- 7) Monthly throughput of each coatings for the automatic finishing line (EP-A121)
- 8) Monthly VOC emissions from each coating calculated assuming that 100% of the VOC in the coating are emitted. The following equation shall be used for that purpose.

$$\text{Monthly VOC Emission (tons)} = \text{Monthly Coating Usage (gal)} \times \text{Density of Coating} \left(\frac{\text{lb}}{\text{gal}}\right) \times \frac{\text{Weight percent of VOC in Coating}}{100} \times \frac{\text{ton}}{2000 \text{ lb}}$$

- 9) Total monthly emissions of VOC calculated by summing the monthly VOC emissions from each coating.
- 10) 12-Month rolling VOC emissions calculated by summing the current month's VOC emissions and the VOC emissions from the previous eleven (11) months.
- 11) The VOC limit and indication of compliance with Special Condition 1.A.

2. Alternative Materials

A. W. W. Wood Products, Inc. is allowed to use alternative materials for the automatic finishing line (EP-A121) that are different from the materials listed in the Application for Authority to Construct.

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

- B. The limits established by Special Condition 1 shall include emissions from the use of any alternative materials. Their emissions shall be accounted for in the recordkeeping associated with this limit.
 - C. W. W. Wood Products, Inc. shall maintain a list of any alternative materials used and the date they are either first purchased or used.
 - D. W. W. Wood Products, Inc. shall maintain a copy of the alternative material's information and other documentation (such as SDS) used to estimate the emissions. W. W. Wood Products, Inc. shall use the highest VOC concentrations listed on the material's SDS to calculate and track emissions from the alternative materials.
3. Capture and Control Device Requirement – Cabinet with Filters
- A. W. W. Wood Products, Inc. shall capture emissions from the spray guns using a cabinet connected to paint filters.
 - B. All coatings shall be applied inside the booth and sprayed in a direction away from any openings.
 - C. Negative pressure shall be maintained in the cabinet. W. W. Wood Products, Inc. shall demonstrate negative pressure using visual indicators such as streamers, powder puff, smoke, or other methods approved by the Missouri Air Pollution Control Program. The visual indicators shall be installed at the inlet opening and observed once per day while the equipment is in operation. Results of the observation shall be noted in a log.
 - D. The filters shall be operated and maintained in accordance with the manufacturer's specifications. The filters shall be equipped with a gauge or meter, which indicates the pressure drop across the control device. These gauges shall be located such that Department of Natural Resources' employees may easily observe them.
 - E. Replacement filters shall be kept on hand at all times. The filters shall be made of fibers appropriate for operating conditions expected to occur (i.e. temperature limits, acidic and alkali resistance, and abrasion resistance)
 - F. W. W. Wood Products, Inc. shall monitor and record the operating pressure drop across the filters at least once every 24 hours while the process is in operation. The operating pressure drop shall be maintained within the design conditions specified by the manufacturer's performance warranty.

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

- G. W. W. Wood Products, Inc. shall maintain a copy of the filter manufacturer's performance warranty onsite.
- H. W. W. Wood Products, Inc. shall maintain an operating and maintenance log for the cabinet and filters which shall include the following:
 - 1) Incidents of malfunction, with impact on emissions, duration of event, probable cause, and corrective actions; and
 - 2) Maintenance activities, with inspection schedule, repair actions, and replacements, etc.
- 4. Operational Requirement - Solvent/Ink Cloths
 - A. W. W. Wood Products, Inc. shall keep the coating solutions in sealed containers whenever the materials are not in use. W. W. Wood Products, Inc. shall provide and maintain suitable, easily read, permanent markings on all coatings used with this equipment.
- 5. Record Keeping and Reporting Requirements
 - A. W. W. Wood Products, Inc. shall maintain all records required by this permit for not less than five years and shall make them available immediately to any Missouri Department of Natural Resources' personnel upon request. These records shall include SDS for all materials used.
 - B. W. W. Wood Products, Inc. shall report to the Air Pollution Control Program's Compliance/Enforcement Section, by mail at P.O. Box 176, Jefferson City, MO 65102 or by email at AirComplianceReporting@dnr.mo.gov, no later than 10 days after the end of the month during which any record required by this permit shows an exceedance of a limitation imposed by this permit.

REVIEW OF APPLICATION FOR AUTHORITY TO CONSTRUCT AND OPERATE
SECTION (5) REVIEW

Project Number: 2019-03-058
Installation ID Number: 207-0019
Permit Number: 062019-011

Installation Address:

W. W. Wood Products, Inc.
12140 Main Street
Dudley, MO 63936

Parent Company:

W. W. Wood Products, Inc.
12140 Main Street
Dudley, MO 63936

Stoddard County, S21, T25N, R9E

REVIEW SUMMARY

- W. W. Wood Products, Inc. has applied for authority to install a new automatic finishing line to coat cabinet parts (EP-A121).
- The application was deemed complete on April 12, 2019.
- HAP emissions are expected from use of the coatings. HAPs expected are ethylbenzene, xylene, naphthalene, formaldehyde, toluene, and chromium compounds.
- None of the New Source Performance Standards (NSPS) apply to the project.
- None of the NESHAPs apply to this installation.
- The Maximum Achievable Control Technology (MACT) Standard, 40 CFR Part 63, Subpart JJ, *National Emission Standards for Wood Furniture Manufacturing Operations*, applies to the installation.
- A cabinet with paint filters is being used to control the particulate emissions from the coating spray guns in this permit.
- This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Conditioned potential emissions of xylene are above de minimis levels. Potential emissions of ethylbenzene, toluene, and chromium compounds are indirectly conditioned below de minimis levels. However, a major section (9) review is not required because the equipment is subject to MACT Subpart JJ. Potential VOC emissions are directly limited to less than the *de minimis* level.
- This installation is located in Stoddard County, an attainment area for all criteria pollutants.

- This installation is not on the List of Named Installations found in 10 CSR 10-6.020(3)(B), Table 2. The installation's major source level is 250 tons per year and fugitive emissions are not counted toward major source applicability.
- Ambient air quality modeling was not performed for this review. Although potential emissions of some individual HAPs exceed the SMAL, the surface coating operation is subject to MACT Subpart JJ and the US EPA has completed the Risk and Technology Review (RTR) for this source category.
- Emissions testing is not required for the equipment as a part of this permit.
- An update to your Part 70 Operating Permit is required for this installation within one (1) year of equipment startup.
- Approval of this permit is recommended with special conditions.

INSTALLATION DESCRIPTION

W. W. Wood Products, Inc. manufactures wooden kitchen and bath cabinetry. The installation consists of several buildings located on different streets in Dudley. The installation is a major source of VOC and HAP and holds a Part 70 operating permit. The following New Source Review Permits have been issued to W. W. Wood Products, Inc. from the Missouri Air Pollution Control Program.

Table 1: Permit History

Permit Number	Description
022019-005	2018-11-022: Section (5) Permit for an air curtain destructor
112017-009	2017-06-014: Section (5) Permit for woodworking equipment
042017-002	2017-01-030: Section (6) Permit for a new automatic finishing line
072015-006	2015-04-010: Phase 2 for one automatic finishing line.
032015-017	2015-01-023: Section (6) Permit. Phase 1 for spray application of surface coating to wooden cabinet parts
102012-015A	2014-04-065: Alternative coatings.
102012-015	2012-08-012: Add 2 finishing lines.
	2011-03-043: Interprogram coordination task, resource recovery.
012006-010B	2011-02-038: Permit amendment. Operating hours.
012006-010A	2007-05-116: Permit amendment. RTO changes.
012006-010	2005-11-048: Section (5) Permit. Addition of 2 automatic flat-line, sealcoat/topcoat and finish drying systems, 1 regenerative thermal oxidizer, and 9 spray booths and permission for continued operation of the Air Curtain Destructor.
062005-007	2005-02-104: Section (5) Permit. Addition of an automatic flat-line, sealcoat/topcoat application and finish drying system in the Shiloh Custom Cabinetry Division.
OP2011-023	2004-12-001: Part 70 Operating Permit renewal.
012005-006	2004-10-015: Section (5) Permit. Addition of two spray booths in the Shiloh Custom Cabinetry Division.
112004-007	2004-09-001: Section (5) Permit. Addition of one spray booth to Sequoia Division.
092004-015	2004-07-070: A Section (6) permit issued for the addition of an automatic flat-line, sealcoat/topcoat application and finish drying system in the Shiloh Custom Cabinetry Division.

Permit Number	Description
102001-002	2001-07-021: A Section (5) permit issued for the addition of a new wood waste grinder.
102001-008	2001-05-009: A Section (5) permit issued for the addition of 6 new spray booths and 2 new propane space heaters.
0499-009	1999-02-070: A Section (5) permit issued for 1 new De Vilbis lacquer spray booth.
OP2000-054	1998-01-068: Part 70 Operating Permit.
0898-015	1998-03-103: A Section (6) permit issued for the addition of 5 new paint booths.
0698-019	1998-02-0228: A Section (5) permit issued to convert the existing House Door Shop into the Savannah Cabinetry operation.
1093-012	4600-0019-006: A Section (6) permit issued to move an existing Kitchen Cabinet shop to a new building.
0792-004	4600-0019-005: A Section (5) permit issued to add a wood waste fired boiler and storage system.

PROJECT DESCRIPTION

W.W. Wood Products, Inc. proposes to install a new automatic finishing line for coating of cabinet parts (EP-A121). This new finishing line will serve as part productions process of the Shiloh product line. Although the installation received Construction Permit 042017-002 for a similar coating unit (EP-B40), these two projects are not related due to their timelines. Permit 042017-002 was issued in April 2017, and the application for this project was received in March 2019. Almost two years passed between projects, therefore they are separate.

Cabinet parts are loaded onto the feed conveyor to be transported to the application chamber where the finishing material is applied by eight (8) automatic spray guns. Each spray gun has a seven (7) ounce per minute rate of application. The spray guns are air assisted guns. The cabinet parts are then conveyed to and through the drying system. The drying system has two chambers, an ambient air chamber and an infra red chamber. Parts are then conveyed out and proceed onto the assembly process.

The application chamber will be maintained under negative pressure. Although the facility included thirty-three (33) coatings in the permit application, it will be allowed to use other types of coatings as well. It is subject to MACT Subpart JJ, which means that for any HAP emissions that are greater than the SMAL or major source level, no modeling will be required and a Section (9) permit will not be needed. The facility, however, shall ensure that the total VOC emissions from all of the coatings are still below the VOC limit of 40 tpy in compliance with Special Condition 1.A.

EMISSIONS/CONTROLS EVALUATION

Particulates (PM_{2.5}, PM₁₀, and PM), VOC, and HAPs are expected from the use of the coatings. The facility expects to use thirty-three (33) different types of coatings. VOC and volatile HAPs emissions were calculated assuming that all of the VOC and HAPs are emitted. VOC and individual HAPs content were taken from the SDS of each coating. Potential emissions were calculated using mass balances on a per pollutant basis, providing a conservative estimate of emissions.

For the particulates, emissions were calculated assuming that the transfer efficiency is 60%. An air assisted airless is expected to have greater transfer efficiency than an air-atomized gun (50%), but lower transfer efficiency than an airless gun (75%). Therefore, 60% is a reasonable estimate of transfer efficiency. The transfer efficiencies from the air-atomized and the airless guns came from APTI Course 482, *Sources and Control of Volatile Organic Air Pollutants*, Student Manual, 2002. The capture efficiency of the application chamber is expected to be 100% since it is maintained under negative pressure. Various filters are used on the application chamber, with varying control efficiencies. This permit used filter control efficiencies of 95% for PM, 95% for PM₁₀, and 95% for PM_{2.5}, as these were the lowest values provided in the application. The solids contents were taken from the SDS of the coatings.

The MHDR of the line was determined by using the flow rate of the automatic spray guns and the number of spray guns. The line has eight spray guns and each one can spray seven ounces per minute. Therefore, the MHDR of the line was determined to be 56 ounces per minute, or 26.25 gallons per hour.

The following table provides an emissions summary for this project. Existing potential emissions were taken from Permit No. 022019-005. Existing actual emissions were taken from the installation's 2018 EIQ. Potential emissions of the application represent the potential of the new equipment, assuming continuous operation (8760 hours per year). Conditioned potentials are based on the VOC limitation established in the permit and assumes a linear relationship between pollutants.

Table 2: Emissions Summary (tpy)

Pollutant	Regulatory De Minimis Levels	Existing Potential Emissions	Existing Actual Emissions (2018 EIQ)	Potential Emissions of the Project	Controlled Potential Emissions of the Project	Project Conditioned Potential
PM	25.0	N/D	N/R	384.64	19.23	2.65
PM ₁₀	15.0	109.25	10.35	369.25	18.46	2.54
PM _{2.5}	10.0	N/D	8.82	355.79	17.79	2.45
SO _x	40.0	1.98	0.014	N/A	N/A	N/A
NO _x	40.0	56.58	2.67	N/A	N/A	N/A
VOC	40.0	551.72	220.55	782.22	N/A	<40
CO	100.0	45.86	0.49	N/A	N/A	N/A
GHG (CO ₂ e)	N/A	N/D	N/R	N/A	N/A	N/A
GHG (mass)	N/A	N/D	N/R	N/A	N/A	N/A
HAPs	10.0/25.0	major	N/R	403.08	N/A	20.61
Ethylbenzene	10	N/D	N/D	33.85	N/A	1.73
Xylene	10	N/D	N/D	206.38	N/A	10.55
Naphthalene	10	N/D	N/D	4.59	N/A	0.23
Formaldehyde	10	N/D	N/D	1.25	N/A	0.06
Toluene	10	N/D	N/D	133	N/A	6.80
Chromium Compounds	10	N/D	N/D	24.01 ¹	N/A	1.23

N/A = Not Applicable; N/D = Not Determined, N/R=Not Reported

¹ Includes the weight of the entire compound.

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Conditioned potential emissions of xylene are above de minimis levels. Potential emissions of ethylbenzene, toluene, and chromium compounds are indirectly conditioned below de minimis levels. Potential emissions of VOC are directly conditioned below de minimis levels.

APPLICABLE REQUIREMENTS

W. W. Wood Products, Inc. shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved. For a complete list of applicable requirements for your installation, please consult your operating permit.

GENERAL REQUIREMENTS

- *Operating Permits*, 10 CSR 10-6.065
- *Start-Up, Shutdown, and Malfunction Conditions*, 10 CSR 10-6.050
- *Submission of Emission Data, Emission Fees and Process Information*, 10 CSR 10-6.110
 - Per 10 CSR 10-6.110(4)(B)2.B(II) and (4)(B)2.C(II) a full EIQ is required for the first full calendar year the equipment (or modifications) approved by this permit are in operation.
- *Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin*, 10 CSR 10-6.170
- *Restriction of Emission of Visible Air Contaminants*, 10 CSR 10-6.220
- *Restriction of Emission of Odors*, 10 CSR 10-6.165

SPECIFIC REQUIREMENTS

- *MACT Regulations*, 10 CSR 10-6.075
 - *National Emission Standards for Wood Furniture Manufacturing Operations*, 40 CFR Part 63, Subpart JJ

STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, it is recommended that this permit be granted with special conditions.

PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated March 22, 2019, received March 28, 2019, designating W. W. Wood Products, Inc. as the owner and operator of the installation.
- The safety data sheets (SDS) for each of the thirty-three (33) coatings.

Other documents relied upon in the permit review:

- E-mail communications between W. W. Wood Products, Inc. and the Missouri Air Pollution Control Program.
- APTI Course 482, *Source and Control of Volatile Organic Air Pollutants*, Student Manual, 2002.

RE: New Source Review Permit - Project Number: 2019-03-058

Dear Ms. Campbell:

Enclosed with this letter is your permit to construct. Please study it carefully and refer to Appendix A for a list of common abbreviations and acronyms used in the permit. Also, note the special conditions on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions, your new source review permit application and with your operating permit is necessary for continued compliance. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.

This permit may include requirements with which you may not be familiar. If you would like the department to meet with you to discuss how to understand and satisfy the requirements contained in this permit, an appointment referred to as a Compliance Assistance Visit (CAV) can be set up with you. To request a CAV, please contact your local regional office or fill out an online request. The regional office contact information can be found at the following website: <http://dnr.mo.gov/regions/>. The online CAV request can be found at <http://dnr.mo.gov/cav/compliance.htm>.

If you were adversely affected by this permit decision, you may be entitled to pursue an appeal before the Administrative Hearing Commission pursuant to Sections 621.250 and 643.075.6 RSMo. To appeal, you must file a petition with the Administrative Hearing Commission within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed; if it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the Administrative Hearing Commission, whose contact information is: Administrative Hearing Commission, United States Post Office Building, 131 West High Street, Third Floor, P.O. Box 1557, Jefferson City, Missouri 65102, phone: 573-751-2422, fax: 573-751-5018, website: www.oh.mo.gov/ahc.
