RE: Approval Letter 2014-1

Dear Mr. Rowe:

Diversified Products Manufacturing (DPM) has requested approval of their spill containment liners for use in the repair of state approved overfill spill containers located at gasoline dispensing facilities in the St. Louis non-attainment area (St. Louis City and Franklin, Jefferson, St. Charles and St. Louis Counties).

Based on the information provided by DPM, the Air Pollution Control Program (APCP) finds that the applicant's spill container inserts/liners will provide environmental protection substantially equivalent to that provided by the existing spill container. After reviewing the specifications and installation sheets provided and following discussions with Local, Regional and Central office staff, the APCP has decided to allow the use of spill containment inserts/liners.

Please let this letter serve as approval of your request, contingent upon the following conditions.

- Liners will not be used in instances where the existing damaged spill container should be replaced.
- Liners are installed in accordance with the installation instructions of the manufacturer (notify department staff if unable to install per directions).
- The liners are not modified.
- The correct liner for a specific damaged spill container is used.
- The liners are installed in accordance with any other applicable local, state, or federal statutes or regulations.

Mr. John Rowe

Thank you for your cooperation in this matter. If you should have any questions about this approval, please contact Mr. Richard Swartz at the department's Air Pollution Control Program, P.O. Box 176, Jefferson City, Missouri 65102-0176 or by telephone at (573) 751-6415.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Kyra L. Moore
Director
