Orlando, FL 32828

RE: APPROVAL LETTER 2014-002

Dear Mr. Vautier:

On May 30, 2014, Emco Wheaton Retail requested approval to allow the use of its EMCO A1004EVR spill container in the St. Louis non-attainment area. This letter is to inform you and Emco Wheaton Retail, that the Missouri Department of Natural Resources approves its use.

Based on internal review of the information you provided, the department has determined that approval of the EMCO A1004EVR spill container is appropriate. As part of the internal review process, department and local agency staff reviewed the EMCO A1004EVR spill container, components list, diagrams, and California Air Resources Board ("CARB") information. There were no concerns raised regarding the configuration as submitted.

The EMCO A1004EVR spill container is currently CARB approved under CARB approval VR-105-C. Approval #2014-002 authorizes installation of only the currently CARB approved configuration that EMCO has submitted for approval. Any alternate configurations or modifications require additional approval. All supporting documentation is included as a part of the approval.

Approval Conditions:

This approval of the EMCO A1004EVR spill container is conditional upon the following requirements:

1. All installation and maintenance requirements provided in the CARB certifications (CARB Executive Order VR-105-C or newer) must be followed.

Mr. John Vautier

2. The installation and replacement of the system must follow all instructions in the Installation, Operation and Maintenance Manual.

Thank you for your cooperation in the review process. If you should have any questions about this approval, please contact Mr. Richard Swartz at the department's Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176, by email at richard.swartz@dnr.mo.gov or by telephone at (573) 751-6415.

Sincerely

AIR POLLUTION CONTROL PROGRAM
