

Title 10 – DEPARTMENT OF NATURAL RESOURCES
Division 20 – Clean Water Commission
Chapter 10 – Underground Storage Tanks – Technical Regulations

PROPOSED RULE

PURPOSE: This rule describes the steps for initial investigation of a confirmed release.

10 CSR 20-10.073 Initial Site Characterization

(1) Unless directed to do otherwise by the department, owners and operators must assemble information about the site and the nature of the release, including information gained while confirming the release or completing the initial abatement measures in 10 CSR 20-10.061 and 10 CSR 20-10.071. This information must include, but is not necessarily limited to, the following:

(A) Data on the nature and estimated quantity of release;

(B) Data from available sources or site investigations concerning the following factors:

1. Surrounding populations;
2. Water quality;
3. Use and approximate locations of wells potentially affected by the release;
4. Subsurface soil conditions;
5. Locations of subsurface sewers;
6. Climatological conditions; and
7. Land use.

(C) Results of the site check required under 10 CSR 20-10.072(1)(E); and

(D) Results of the non-aqueous phase liquid investigations required under 10 CSR 20-10.072(1)(F) to be used by owners and operators to determine whether free product must be recovered under 10 CSR 20-10.074.

(2) Within forty-five (45) days of release confirmation, owners and operators shall document the results of the initial characterization in a report to the department or in a format and according to the schedule required by the department.
