

Title 10—DEPARTMENT OF NATURAL RESOURCES
Division 26—Petroleum and Hazardous Substance Storage Tanks
Chapter 5—Aboveground Storage Tanks—Release Response

10 CSR 26-5.030 Site Characterization, Risk Assessment and Corrective Action

PURPOSE:

(1) Site Characterization, Risk Assessment, and Corrective Action.

(A) In response to a release of a regulated substance from an above ground storage tank, owners and operators must conduct site characterization, risk assessment, and corrective action in accordance with 10 CSR 26-2.075 through 10 CSR 26-2.081 if:

1. One or more chemicals of concern attributable to the release are found in soil or groundwater on or near the site at concentrations above the default target levels in 10 CSR 26-2.078 Table 1 and owners and operators choose not to conduct corrective action under 10 CSR 26-5.020(9) to meet the default target levels;

2. Free product is present; or

3. The department determines compliance with the rules is warranted based on site-specific conditions that could result in pollution of the waters of the state or unacceptable risk to human health and the environment.

AUTHORITY: sections 319.137, 644.026, and 644.143 RSMo 2000. Original rule filed Sept. 13, 2001, effective May 30, 2002.*

**Original authority: 319.137, RSMo 1989, amended 1993, 1995; and 644.026, RSMo 1972, amended 1973, 1987, 1993, 1995, 2000.*
