

B.10 MODELS/EQUATIONS FOR ESTIMATING DTLs, TIER 1 AND 2 RISK-BASED TARGET LEVELS WITHIN THE MRBCA PROCESS

	<u>Page</u>
1. Indoor Inhalation of Vapors (Child and Adult Resident, Non-residential Worker)	B-8
2. Outdoor Inhalation of Vapors (Construction Worker)	B-9
3. Dermal Contact with Chemicals in Water (Child and Adult Resident, Non-residential Worker; and Construction Worker)	B-10
4. Domestic Water Use (Child and Adult Resident) (Chemicals without MCL)	B-12
5. Dermal Contact with Chemicals in Soil (Child and Adult Resident, Non-residential Worker, and Construction Worker)	B-14
6. Ingestion of Chemicals in Soil (Child and Adult Resident, Non-residential Worker, and Construction Worker)	B-15
7. Inhalation of Vapors and Particulates of Chemicals in Soil (Child and Adult Resident, Non-residential Worker, and Construction Worker)	B-16
8. Inhalation of Vapors and Particulates, Dermal Contact with and Ingestion of Chemicals in Soil (Child and Adult Resident, Non-residential Worker, and Construction Worker)	B-17
9. Indoor Inhalation of Vapors (Age-Adjusted Resident)	B-19
10. Dermal Contact with Chemicals in Water (Age-Adjusted Resident)	B-21
11. Domestic Water Use (Age-Adjusted Resident) (Chemicals without MCLs)	B-23
12. Dermal Contact with Chemicals in Soil (Age-Adjusted Resident)	B-26
13. Ingestion of Chemicals in Soil (Age-Adjusted Resident)	B-28
14. Inhalation of Vapors and Particulates of Chemicals in Soil (Age-Adjusted Resident)	B-30
15. Inhalation of Vapors and Particulates, Dermal Contact with, and Ingestion of Chemicals in Soil (Age-Adjusted Resident)	B-32
16. Subsurface Soil Vapor Concentrations Protective of Indoor Vapor Inhalation	B-33
17. Subsurface Soil Concentrations Protective of Indoor Vapor Inhalation	B-34
18. Groundwater Concentrations Protective of Indoor Vapor Inhalation	B-35
19. Groundwater Concentrations Protective of Outdoor Vapor Inhalation	B-36
20. A. Volatilization Factors (Surficial Soil to Outdoor Air)	B-37
B. Volatilization Factors (Particulate Emissions from Surficial Soil	B-38
C. Volatilization Factors (Subsurface Soil Vapor to Indoor Air)	B-39
D. Volatilization Factors (Subsurface Soil to Indoor Air)	B-40
E. Volatilization Factors (Groundwater to Indoor Air)	B-41
F. Volatilization Factors (Groundwater to Outdoor Air)	B-42
21. Effective Diffusion Coefficients	B-43
22. Subsurface Soil Concentrations Protective of Leaching to Groundwater	B-44
23. Leaching Factor from Subsurface Soil to Groundwater	B-45
24. Soil Concentration at Which Dissolved Pore Water and Vapor Phases Become Saturated	B-46
25. Soil Vapor Concentration at Which Vapor Phase Becomes Saturated	B-47
26. Domenico Model: Dilution Attenuation Factor (DAF) in the Saturated Zone	B-48
27. Allowable Soil and Groundwater Concentration for Groundwater Resource Protection	B-49
28. Allowable Soil and Groundwater Concentration Protective of Indoor Inhalation for Resident and	

Non-Residential Worker	B50
29. Stream Protection: Allowable Groundwater Concentration at the Point of Discharge	B-51
30. Stream Protection: Allowable Soil and Groundwater Concentration at the Source & POD	B-52
