RE: Approval of Class 1 Permit Modification with Prior Director Approval  
Disposal of Asphalt in the On-Site Hazardous Waste Landfill  
Buick Resource Recycling Facility, LLC, Boss, Missouri  
EPA ID# MOD059200089

Dear Mr. Lanzafame:

The Missouri Department of Natural Resources (department) hereby approves Buick Resource Recycling Facility, LLC's (BRRF) Class 1 Permit Modification request, dated November 7, 2016, with modifications. The request was to utilize the on-site hazardous waste landfill for the disposal of asphalt from the facility, after proper characterization and treatment, if necessary.

The department agrees with BRRF that this is a Class 1 Permit Modification requiring prior Director approval, according to Code of State Regulations 10 CSR 25-7.270(1), which incorporates Code of Federal Regulations 40 CFR 270.42(d)(1). We are approving the Class 1 Permit Modification request with modifications as follows:

- 1) Only asphalt originating on the permitted facility property may be disposed of in the hazardous waste landfill at the BRRF facility. Asphalt shall be characterized and treated as follows:
  - a) Proposed disposition of any waste asphalt originating from within a regulated hazardous waste management unit shall be requested via a Class I permit modification with prior Director's approval. This request shall specify how the waste asphalt will be characterized and, if necessary, treated prior to disposal and what documentation will be provided for the asphalt's ultimate disposition.

Recycled paper

- b) Waste asphalt originating on the permitted facility property outside of any regulated hazardous waste management units shall go through the steps for characterization outlined in the approved Construction/Maintenance Soil Excavation Plan, dated July 16, 2007, or the most recent version of this plan approved by the Department. When this asphalt is removed, soil sample(s) from beneath the area shall be collected and analyzed according to this plan. A summary of the above activities shall also be reported to the department in accordance with this plan.
- 2) Fifteen (15) days prior to any excavation/removal of asphalt at the facility, BRRF shall notify the department of the proposed work, allowing the department the opportunity to observe the operations.

BRRF must send a notice of this modification to everyone on their facility mailing list and the appropriate units of state and local government within 90 calendar days after the date of this letter, according to 10 CSR 25-7.270(1), which incorporates 40 CFR 270.42(a)(1)(ii). BRRF must send a copy of the notice to the department.

This permit modification may include conditions that you are not familiar with or that are different from or in addition to the conditions of your current permit. We would be pleased to meet with you to discuss any questions you may have related to the permit modification conditions. An appointment can be set up by contacting Mr. Nathan Kraus, P.E., of my staff at the Missouri Department of Natural Resources, Hazardous Waste Program, P.O. Box 176, Jefferson City, MO 65102-0176, by telephone at (573) 751-3553 or 1-800-361-4827, or by e-mail at [nathan.kraus@dnr.mo.gov](mailto:nathan.kraus@dnr.mo.gov). Any follow-up in response to your meeting request, whether by telephone, in-person meeting, or on-site visit, is considered Compliance Assistance and will focus on explaining the permit modification conditions to you. Thank you.

Sincerely,

HAZARDOUS WASTE PROGRAM
