

Land Application of Sludge Checklist
Sludge handling checklist for wastewater treatment facilities

- 1) What method (land application, incineration, landfill, etc) is used for sludge management?

- 2) How often is sludge removed from the facility?

- 3) When is the last time sludge was removed?

- 4) Has the Form S annual report been submitted?

- 5) Is the monitoring frequency for metals, pathogens and vectors (WQ 423) being met?

- 6) Are the requirements for pathogens and vector attraction (WQ 424) being met?

- 7) Are land applied biosolids below the ceiling concentration for metals (WQ 425)?

- 8) Are the nitrogen, soil pH and soil phosphorus limitations (WQ426) being met?
