# Annual Report for the South Central Solid Waste Management District for FY 2012 from July 1, 2011 to June 30, 2012

## 1. REGION P

2. District Name: **South Central Solid Waste Management District -**

3. Fiscal Year Period: **From July 1, 2011 to June 30, 2012.**

**District** Full Council meetings serve as planning sessions and information sharing workshops. The District Full Council includes the Executive Board, Representatives from the member cities and counties and the Advisory Board. The Full Council of the South Central Solid Waste Management District met on January 27, 2011 to start the planning process for FY2012. The Full Council met on June 2, 2011 to approve up the budget for FY 2012 administration and Plan Implementation. The Full Council updated the policies for the FY2012 grant cycle and the District goals for FY 2012 were set at that meeting. Copies of the minutes from all of the district meetings are included in the section with the information on Board and Council members.

## **4(A); 5(A); 6(A) FY2012 GOALS for Waste Reduction, Recycling and Resource Recovery and Actions taken to achieve those Goals**

1. **Public Education on Waste Reduction, Recycling and Resource Recovery.** Educating and informing the public is a key goal of the District. Public Education and Information is funded through the Technical Assistance Program, a part of the Plan Implementation Grant
  - The District Coordinator meets with civic groups throughout the year and continues to provide information on current programs and program expansion possibilities.
  - The District Coordinator and District personnel set up and staff booth- space at many civic and cultural events in the cities and counties of the district.
  - Items made from reuse materials are purchased and used as an educational tool to show how materials can be repurposed rather than landfilled.
  - Items made from recycled materials are purchased and used as an educational tool to show how recycled materials can be made into other useful products.
  - District personnel provide waste audits services to businesses in the district. The audits are used to help those businesses devise plans to lessen the amount of waste they generate for disposal.
  - The District provides funding to schools to set up and continue recycling programs.
  - District personnel and solid waste management workers from the district attend training and conferences to keep up with current trends and learn from the successes and failures of others.
2. **Support for current programs** - Many of the current recycling programs will face financial problems in the coming year due to increased fuel costs and lower prices for processed materials. The District continues to support the recycling programs that are operating in the district. We will provide funds for equipment and operations including wages for employees.
3. **Cost effective District-wide collection Program- District-wide projects are a cooperative effort between the cities and counties and the district and have proven to be most successful.** The District will again apply for grants on behalf of the seven counties of the District for: Household Hazardous Waste, Electronics, and scrap tires. Trained local district personnel work at "One Day Mobile" collections for Paint, oil, antifreeze, batteries, pesticides and herbicides, old computers, computer parts, television sets and microwaves. The collection list is provided in this document. The District will assist in the collection and recycling/disposing of computers from businesses, public entities and schools. Scrap tire amnesty days are held periodically in the cities and counties of the District.

SWMP OPERATIONS

4. **For FY2012 the District will use grant funds to help sub-grantees with projects. Priority will be given to projects as follows:**

1. Collection/Processing - equipment  
Collection/Processing - operation
2. Household Hazardous Waste
3. Illegal Dumping
4. Electronics Collections
5. Compost Equipment
6. Waste Reduction Education
7. Market Development

RECEIVED BY

NOV 29 2012

SWMP OPERATIONS

- The District will accept grant applications on a quarterly basis. This will encourage better projects. Each complete grant application will be evaluated in the calendar quarter in which it is submitted.
- There will be a \$30,000 limit on the amount of grant funds available for any one project of a city, or county.
- A city or county project can receive a maximum of \$30,000 in a one-year period. An entity can request a two (2) year grant timeline with the required special pre- approval from the Executive Board.
- Collection/Processing: operating costs requested for labor/wages will remain the same as in past years. The District will pay up to a maximum of \$7.50/hour or minimum wage, up to 2080 hours /year - \$15,600. Any entity requesting help with labor costs will have to pay all other employee costs.
- No match will be required for grant projects. No extra points will be given to applicants that provide match.
- There will be a minimum amount of points a grant application must get before it will qualify for funding. The minimum is 100 for FY 2012.

**4(B); 5(B); 6(B): FY 2013 GOALS for Waste, Recycling and Resource Recovery and planned actions to meet those goals**

The Full Council {the Executive Board, Representatives from the member cities and counties and the Advisory Board} of the South Central Solid Waste Management District met on January 19, 2012 to start the planning process for FY2013. Council meetings serve as planning sessions and information sharing workshops with the advisory board. At that meeting, the Council became aware that District grant funding would again be less than anticipated. Adjustments were made to the District Administration and Plan Implementation grants to reflect the decreased funding.

The Full Council met on June 21, 2012 to amend the budget for FY 2013 administration and Plan Implementation. The Full Council updated the policies for the FY2013 grant cycle and the District goals for FY 2013 were set at that meeting. Copies of the minutes from all of the district meetings are included in the section with the information on Board and Council members. The District signed and submitted the FAA for FY2013 with the Department of Natural Resources by the required June 1, 2012 date. The District does not agree with many of the Terms and Conditions that will take effect on July 1, 2013. The District will request that the Terms and Conditions be reviewed and amended by a group of stakeholders.

## FY 2013 GOALS:

1. **Continued Support for Current Programs** -The District will continue to support the publicly owned recycling programs that are operating in the district. These programs include: In Douglas County- Do Co, Inc.; In Howell County - City of Mountain View Recycling Program, The City of West Plains Recycling Program and the City of Willow Springs Recycling Program; In Oregon County- Oregon County Recycling Program (OCRA); In Ozark County – the Ozark County recycling program; In Shannon County – The Shannon County Recycling Program which is managed through the District; and In Texas County - The Texas County Recycling Program which is managed through the district.
2. **For FY2013 the District will use grant funds to help sub-grantees with projects. Priority will be given to projects as follows:**
  1. Collection/Processing - equipment  
Collection/Processing - operation
  2. Household Hazardous Waste
  3. Illegal Dumping
  4. Electronics Collections
  5. Compost Equipment
  6. Waste Reduction Education
  7. Market Development
  - The District will evaluate FY2013 grant applications for city and county projects on semi-annual basis (twice per year) in September and March.
  - There will be a \$30,000 limit on the amount of grant funds available for any one project of a city, or county.
  - A city or county project can receive a maximum of \$30,000 in a one-year period. An entity can request a two (2) year grant timeline with the required special pre- approval from the Executive Board.
  - The District will provide grant funds for equipment and operations – including wages for workers at the recycling centers. Collection/Processing: operating costs requested for labor/wages -wage reimbursements will be cut back \$7.00/hour up to 2080 hours /year - \$14,560.00. Any entity requesting help with labor costs will have to pay all other employee costs.
  - No match will be required for grant projects. No extra points will be given to applicants that provide match.
  - There will be a minimum amount of points a grant application must get before it will qualify for funding. The minimum is 100 for FY 2013.
3. The District will apply for grants on behalf of the seven counties of the District. The District will submit a district grant for HHW collections and Electronics collections that will include a program for collecting and recycling/disposing of computers from several businesses such as banks and schools. Grants for these programs will be applied for at the same level as FY2012: \$30,000.00 for HHW and \$20,000.00 for Electronics. All day labor for any collection program will be considered as employees of the district. Employers match for medi-care and social security will be paid from the grant. Due to another expected decrease in funding, grants for Scrap tire amnesty days, and the Illegal Dumping program funding request will submitted at lower funding levels than FY2012.

RECEIVED BY  
NOV 29 2012  
SWMP OPERATIONS

4. Technical Assistance funds will be used to provide training for district personnel and other interested persons from the district, in several areas, including how to disposal of old appliances, HHW training Hazardous Waste continuing education as well as residential recycling and innovative waste reduction.
5. It is the policy of the District to support the recycling programs in the district. Trash collection and Recycling services are available throughout the district. It is not all curbside collection, but we are striving to make the services as convenient as possible. All of the publicly owned recycling centers have received multiple grants from the district. It is expected that this practice will continue. The District has provided funding to several privately owned programs as well.
6. The South Central Solid Waste Management District acknowledges that travel is often necessary for training, to learn from the successes of others, and to showcase our accomplishments. The District agreed to follow the State of Missouri travel policy. That policy governs allowable expenses, the means by which travel is obtained, and the required procedures, and documentation. We will continue to try to accomplished all travel in the most economical and efficient manner possible.

**7. FY2013 District Targeted Materials List**

- Electronics, - including televisions and computers
- Cardboard
- Mixed Paper, - including Old Newspaper and Magazines
- Glass
- Plastics
- Bi-Metal Containers
- Household Hazardous waste
- Used Oil
- Lead acid (vehicle) batteries
- Scrap Tires
- Yard Wastes- including leaves and brush
- Food Waste
- Demolition Waste
- White Goods/old Appliances
- Bulky Wastes - including old furniture
- Textiles -including old clothing and shoes
- Compact Fluorescent light bulbs -if economically feasible
- Rechargeable batteries

# MEASURING SUCCESS

## 7. Projects in FY 2012 that resulted in tonnage diversions from Landfills

**2010-11 and 2012-7 Shannon County Recycling Program – \$11,800 grant each year to pay wages for a part worker (2 days per week) and expenses (fuel, and maintenance) for the program.**

The Shannon County recycling program has been in operation since 1995. Sometimes it can support itself with funds from the county, bag sales, and user fees. Other times it needs help from the district to keep going. For the 2010 grant period, the funds from the county and bag sales allowed a 1-year program to keep going for over a year and a half. During that time, bag sales increased and more users started on the program. The county recycling program brings in a large amount of materials to the Mountain View Center. This program is considered a success because it makes recycling available for many people throughout Shannon County and provides a part time job for a worker in Shannon County. About 104 Tons (2 tons per week) of materials are collected for recycling through this project each year. The materials are counted with the amounts from the Mountain View Recycling Center, which receives all of the revenue from the sale of materials. The county contributes \$100 per month toward the cost of fuel for the truck to do the collections.

SWMP OPERATIONS

**2011-03 HHW Collections - \$30,000.00 granted- \$29,826.00 used \$174.00 rolled over to 2012-03**

The disposal of Hazardous waste from households into landfills in Missouri is an allowable activity. The South Central Solid Waste Management District holds one-day mobile HHW collections to decrease the amount of these materials that are disposed of municipal solid waste landfills. This project provides part time work for several people in the district. The district trains personnel to do the collection activities. In the spring of 2011, nine HHW Collections were held. The collection schedule is included. Six hundred sixty four (664) households attended the spring collections, or about 1.5% of the households in the district. About 32 tons of waste was transported for disposal. The program was funded for \$30,000.00 for the spring of 2011. The cost per ton for material disposal is estimated at less than \$750.00/ton. However, the more important cost of about \$40 per household is a much better measure. Two Drug Take Back days were held in 2011. In April 2011- Two hundred and twenty seven pounds (227 lbs) of old Pharmaceuticals were collected at 6 sites in the District. In September 2011, One hundred ninety one (191 lbs) of old pharmaceuticals were collected and disposed of through the DEA program.

In 2011, the South Central Solid Waste Management District was the recipient of the North American Hazardous Materials Managers Association award for Long Standing Program Excellence. Tim and Lynda Roehl presented highlights of the South Central Solid Waste Management District's HHW Program at the NAHMMMA Conference in Portland Oregon.

**2012-03 HHW Collections - \$30,000 granted \$28,500 spent to date**

The collection of Household Hazardous Waste from residents in Region P is a valuable service that the district provides for its members. The safety and protection of sanitation workers and the reduction of the toxicity of materials that are land filled are the goals that the solid waste district hopes to achieve through the continuance of its HHW program. Approximately 40 T. of waste was transported for disposal.

Ten (10) collections were held in the spring of 2012. The collection schedule is included. Eight hundred and nine (809) households participated. The cost for this project remains between \$650 and \$800 per ton and right at \$35 per participating household.

In 2012, this program also included two "Drug Take Back Day". The District coordinator helps set up the collection sites throughout the district and does the paperwork, advertising, and schedules the final pick-ups. The District provides civilian personnel for the collection sites as well as provides a small stipend for law enforcement officials.

Over 512 pounds of old pharmaceuticals were collected at seven sites throughout the district in April 2012. Another 597 pounds were collected at the September 2012 Drug Take Back Day. The District will continue to participate in these events as there is a need and the district has funds for the program. The following note from the DEA program manager S. Scott Collier sums up why this program is considered successful...

I want to thank all of you for your hard work on this project. One last statistic for you:

In 2011, there were roughly 900,000 fewer chronic abusers of Rx drugs compared to 2010. That translates to a roughly 12% drop. We know that 54% of chronic Rx narcotic abusers get their meds from friends/family for free, or in other words a medicine chest. Your participation shrinks that source of supply and it seems your efforts are bearing fruit. You are making a difference in your communities.

Thank you for your time and effort.

Scott

SWMP OPERATIONS

**2011 -04 - Electronics Collections-** The 2011 program was funded for \$30,000.00 but only \$21,202.82 was spent. The remaining \$8797 was rolled over to the 2012 project. Approximately 100 Tons of materials were collected in the spring of 2011. During the bidding process, some of the recyclers said they could do the recycling and reuse of computers for no additional fees. The expenses for this program for 2011 were for the transportation to the recycler and for labor to do the collections. Electronics were collected with HHW, which keeps the cost of both projects lower. Electronics from Businesses including schools are ban from landfills in Missouri. The District's electronics Project is open to businesses and schools. Computer disposal was provided to three banks, 4 courthouses/city halls, at least 14 businesses and 6 schools.

**2012-04 - Electronics Collections-** Approximately 150 T of materials were collected by June 30 2012. The 2012 program was funded for \$20,000. For the 2012 collection program, the same company will do the final disposition. The expenses for this program for 2012 are for the transportation to the recycler and for labor to do the collections. Electronics collections and the HHW collections are held at the same time and place. The Project is open to businesses and schools. Computer disposal was provided to several businesses and schools. The cost to the program for electronics collections in 2012 was approximately \$133.00 per ton or a less than \$5 per unit.

**The District has made helping publically owned recycling centers to remain open and programs to stay in operation, a priority for grant funds. Currently eight recycling programs receive assistance from the District.**

**2011-09 -\$17,500 and 2012-08- \$12960.00- Texas County Recycling Program-** The District grant pays the first \$7.50 of wages for a person to work up to 24 hours each week to collect the cardboard from businesses in the cities of Licking and Houston. A survey of businesses that use the program shows that they like the program. It helps the businesses save money on their trash bill and they feel it helps the environment. The grant pays only for the pick-up of the cardboard. The baling of the cardboard provides another worker with a part time job. The sale of processed cardboard helps this small business to pay the other expenses of the recycling program for Texas County.

**2011-10 – Partial Wages for a worker at the Ozark County Recycling Center -\$15,600.00**

The District grant paid the first \$7.50/hr. for a worker at the Center. The County has financial trouble and needs help with paying the expenses for having a recycling center in the county. This district grant for partial reimbursement of wages paid for one full time worker at the center, allows the county to keep the center open and fully staffed. The center processes about 350 tons of materials for recycling each year.

**2011-11– Partial wages for a worker at the Oregon County Recycling Center -\$15,600.00**

This District grant pays \$7.50 per hour for a worker at the Center. The Center is in financial trouble because the county is in financial trouble and had to cut back on the amount they can pay to the center for services. This grant helps pay wages for one worker at the center and allows the center to remain open and fully staffed. The center processes about 350 tons of materials for recycling each year.

**2011-12 Do Co, Inc. Partial Wages for a worker for up to 1 year** The District grant pays up to \$7.50 per hour of the wages of a worker at the center for a total of **\$15,600.00**. The center needs help with paying the wages of a full time person to do the recycling program. The district has been helping with wages at the center for several years. The center processes about 350 Tons of materials each year. This project provide labor for the processing but not direct tonnage diversion.

NOV 29 2012

SWMP OPERATIONS

**2012-10 – Wages for a worker at the Ozark County Recycling Center -\$15,600.00** This District grant pays the first \$7.00 per hour for a worker at the Center. The project started May 1, 2012 and allows the center to retain one FTE position.

**012-12 Do Co, Inc. Wages for a worker for up to 1 year- \$15,600.00-** This District grant pays the first \$5.00 per hour for a worker at the Center. The project started May 1, 2012. Helps retain one FTE position.

## **8. Other Projects not resulting in tonnage Diversion:**

### **District Operations: 2011-01 District Operations funded at \$81,500.00 and 2012-01 District Operations funded at \$78,000.00**

This grant funds the expenses of having a full time district planner/coordinator and a district office. It also funds the expenses of the executive board.

The district planner organizes and manages the office for the solid waste district. Duties include but are not limited to: Scheduling and coordinating activities of the Executive Board and Full Council of the solid waste district, Keeping minutes and records of the district activities, writing grants for member cities and counties of the solid district and for district-wide programs, attending meetings in Jefferson City for the Solid Waste Advisory Board and District planners, keeping abreast of the ever-changing demands and paper work of SWMP-MDNR, making sure all time-lines, reports, assessments are completed and turned in to SWMP on time, meet with and set up annual audits with local auditors and State auditors, answering questions and helping the public as necessary.

In addition to these the District planner: manages grants that are District Wide, advertises for bids, plans collections and events, attends local functions to make sure the face of the solid waste district is known to the public, sets up booths at events throughout the seven county district, meets with city and county officials on a regular basis, visits the recycling centers and grant programs to help insure compliance and continued operational success, presents programs at schools and community groups on recycling and district services and activities, writes press releases, and oversees the success of District P solid waste district.

### **Plan Implementation: 2011-02: District Plan Implementation -Technical Assistance funded at \$41,500.00 2012-02– Technical Assistance funded at \$38,500.00**

**Public Education and Information is funded through the Technical Assistance Program, a part of the Plan Implementation Grant.**

- The District Coordinator and District personnel set up and staff booth- space at many civic and cultural events in the cities and counties of the district. A booth was set up at the West Plains Home Show, Go Green Festival, and the Ozark Area Community Congress to name a few.
- Items made from reused and recycled materials are purchased and used as an educational tool to show how materials can be repurposed rather than landfilled. These items were given out at events and at the District's Full Council meetings.
- District personnel provide waste audits services to businesses in the district. The audits are used to help those businesses devise plans to lessen the amount of waste they generate for disposal. Waste Audits were done for two of the biggest businesses in the city of West Plains, DSR- a manufacturing -defense contractor and Ozarks Medical Center.
- The District provides funding to schools to set up and continue recycling programs. Willow Springs, Thayer, and Summersville schools received bins for their recycling programs. The Schools of Shannon County were given recycling bags to use in their recycling program. Thornfield School received a trailer to use for their recycling program.

RECEIVED BY

NOV 29 2012

SWMP OPERATIONS

- District personnel and solid waste management workers from the district attend training and conferences to keep up with current trends and learn from the successes and missteps of others. Tim and Lynda Roehl did a session at the North American Hazardous Materials Managers Association conference. Training in how to deal with the hazards of municipal solid waste was given to the sanitation department of the city of West Plains. District personnel attend Disaster Debris planning training. Sanitation workers were sent to the Residential Recycling Conference. Several district members attended the MORA Conference and the Missouri Waste Control Coalition conference.

**2011-06 Illegal Dumping \$20,000.00 and 2012-06 Illegal Dumping \$20,000.00** - In an effort to reduce illegal dumping the district held several rural collections for bulky rubbish. The District also helped cities with the cost of special cleanups if the city allowed rural residents to bring wastes into the city collection. This program actually increased the amount of waste that is taken to the landfill, but it keeps it out of the woodland, ditches and waterways. Each year for the last several, the district has funded the identification and clean up of illegal dumpsite at \$20,000.00. Two (2) large cleanups funded from 2011-06. The Delp Road Clean up in Howell County and the Pugh site in Texas County.

SWMP OPERATIONS

In 2012 as part of District grant 2012-06, the District helped the Birch Tree Industrial Development Group clean up the "Old shoe factory". The building been rented to Ozark Green for use as a recycling center but the business was engaging in speculative accumulation rather than recycling. The business was in trouble with the Department of Natural Resources and both the building owner and the business owner asked the District for help. The clean up provided part time work to over 30 workers.

## 9. Projects for items Banned from Landfills

**2011-05 Waste Tire Amnesty Days** – \$20,000.00 grant provided the proper disposal and recycling of approximately 10,375 tire equivalents weighing about 103 T. Waste Tire Amnesty Days were funded at \$20,000 for 2010. This is about **\$1865 /Ton**. A list of the collections and costs is included. The cost for tire collections increased due to the rising cost of fuel.

**2012-05 Waste Tire Amnesty Days** – \$20,000.00. Approximately 8087 tires were collected by the end of FY 2012, weighing about 81 T. Waste Tire Amnesty Days were funded at \$20,000 for 2012, approximately \$14,855 has been spent by the end of FY 2012. A list of the collections and costs is included. The project is still open. When all of tire amnesties have taken place, a cost per ton can be calculated.
