Dear Commissioner Cross:

This letter is the official notification that the Department of Natural Resources has approved the request of Camden, Laclede, and Miller counties for designation as a new solid waste management region. This three-county region will be designated as Solid Waste Management Region "T". I congratulate your initiative in cooperatively addressing the solid waste management issue.

The department has reviewed the application materials submitted by Camden, Laclede, and Miller counties and the public comments received regarding the request for designation as a new solid waste management region. The counties have adequately demonstrated that the change is necessary for effective solid waste management within the counties. Additionally, all affected regions and counties have endorsed the change and indicated that it would not negatively impact the solid waste management system in their respective region or county. Resolutions of endorsements have also been provided by a majority of cities over 500 in population in Camden, Laclede, and Miller counties.

Having satisfied all the requirements of the Missouri Solid Waste Management law and the department's technical guidance for applying for a change in regional groupings, the department hereby grants the request and designates Camden, Laclede and Miller counties as Solid Waste Management Region "T".

This letter is also the official notification of formation for the Lake of the Ozarks Solid Waste Management District created pursuant to Section 260.305, RSMo. This district consists of Camden, Laclede, and Miller counties. In order to reach Missouri's goal of a 40% reduction in the amount of solid waste being generated for disposal by 1998, solid waste management districts are required to develop and implement a comprehensive solid waste management plan. The solid waste management plan must meet all the requirements of Sections 260.220 and 260.325, RSMo, and conform with the Model Plan Guidelines For Comprehensive Solid Waste Management issued by the department.

Recycled Paper

The Honorable Merle Cross

Page Two

The solid waste management plan for the Lake of the Ozarks Solid Waste Management District must be submitted to the Department of Natural Resources within 18 months of the date of this letter, pursuant to Section 260.325.3, RSMo. This plan will guide the district's solid waste management activities as it moves towards obtaining a 40% solid waste reduction goal.

Cooperation is critical to achieving this goal. The ability to work together has been demonstrated by completing the requirements necessary to create the Lake of the Ozarks Solid Waste Management District. This spirit of cooperation will be instrumental in developing and implementing effective solid waste management programs. Again, I commend your initiative in taking this major step toward cooperative solid waste management planning and implementation.

Very truly yours,

DEPARTMENT OF NATURAL RESOURCES

Harry W. Kucera for RK

Solid Waste

Resolution

Whereas, House Bill 1732 was recently passed by the Missouri General Assembly and was signed by Governor John Ashcroft on June 19, 1992; and

Whereas, House Bill 1732 allows counties to request changes from one solid waste management region to another or to request the creation of a new region; and

Whereas, Miller County has joined with Laclede and Camden counties to form the Lake of the Ozarks Solid Waste Management District; and

Whereas, Miller County has a long history of cooperation in the planning process with Camden and Laclede counties in a regional planning commission, SBA certified development company and economic development district as well as other associations; and,

Whereas, Miller County has traditionally not had a planning association with the group of counties composing Region H nor with Cole County with which Miller County was originally placed; and

Whereas, Miller County has never participated in the Region H deliberations regarding solid waste management; and

Whereas, Miller County's withdrawal from Region H will not, therefore, negatively affect that region's solid waste management process; and

Whereas, Miller County's placement with Laclede and Camden counties in a new region will facilitate a more productive solid waste management product for Miller County.

Be It Therefore Resolved, that the Miller County Commission requests the formation of a new solid waste management region, composed of Laclede, Camden and Miller counties this 24 day of August, 1992.
