Dear Mr. Nagel:

**Investigation of Odor Control Technologies – 3rd Quarter 2016**

This Update on Odor Control Technology Investigation is being submitted by Bridgeton Landfill, LLC (“Bridgeton Landfill”) pursuant to Paragraph 27(C) of the Second Amendment to the First Agreed Order.

Bridgeton Landfill continues to execute state of the art odor control methodologies in the effort to minimize the potential for any off-site emission of odor. This has included continued investigation of new odor control technologies. Representatives from multiple odor control suppliers visited the Bridgeton Landfill during the third quarter of 2016. The odor control supply representatives did not have any new odor control technologies to recommend. In the third quarter of 2016 Bridgeton Landfill did not discover an emergent technology worthy of field testing at the site.

Sincerely,

Matt Stewart

Environmental Specialist
