Greg,

Attached please find the Title/Cover Page with engineer's stamp and required verbiage for Callaway Farrowing, LLC.

I was hoping to have the other information to you sooner, however the receipts for neighbor notification have been trickling in, and we are currently waiting on 2 to be returned. I will forward these to you as soon as we have them.

Thank you

Subject: Callaway Farrowing, LLC operating permit application

John,

The department's Water Protection Program has received the July 31, 2014 application for a new Missouri State Operating Permit for Callaway Farrowing, LLC in Callaway County. After a review of the operating permit application it has been determined to be incomplete. Please direct your attention to the following comments on the application.

- Submit the title/cover page of the engineering documents, similar document or the attached Form W with the engineers seal stating that the project was designed in accordance with Missouri CAFO design regulations. The department has recently revised the Form W which provides a place for the engineer seal for this purpose.
- The neighbor notice letter did not provide the name, address, and telephone number of the registered agent or CAFO owner as required by 10 CSR 20-6.300(3)(C)1D. A registered agent is defined in 351.370 RSMo as "A registered agent, which agent may be either an individual, resident in this state, whose business office is identical with such registered office, or a corporation authorized to transact business in this state having a business office identical with such registered office." The registered agent listed for Callaway Farrowing, LLC on the Missouri Secretary of State's Business website is "\$49 Registered Agent

Services, Inc.” in Osage Beach, MO. The neighbor notice must be resent and include the name, address, and telephone number of the registered agent or CAFO owner to all required parties and proof of neighbor notice must be submitted to the department.

If you have any questions or comments, please contact me.
