- Setting Baselines
Recommendations
Practices
Recommendations

- December 18, 2015 meeting cancelled
- January 22, 2016, location Lewis & Clark State Office Building, 1101 Riverside Dr., Jefferson City, Missouri
- February TBD
- March TBD

DRAFT GOALS STATEMENT

The department and those stakeholders participating in this work group strongly support the establishment of a voluntary water quality trading framework for Missouri as one of the tools to help meet local and state-wide water quality goals. For water quality trading to occur, we need a framework that is effective, efficient, and equitable for all those who wish to form a water quality trading program or to buy or sell credits within a trading program.

The department and those stakeholders participating in this work group strongly support the establishment of a voluntary water quality trading framework for Missouri as one of the tools to help meet local and state-wide water quality goals. For water quality trading to occur, we need a framework that is effective, efficient, and equitable for all those who wish to form a water quality trading program or to buy or sell credits within a trading program.

The goal of this group is to provide a framework for water quality trading programs in Missouri. This will take the form of a document that will explain to any organization that seeks to establish a trading program the key elements expected to be included in its proposal to the Clean Water Commission.
