

Clean Water Forum Evaluation Results

Dec. 13, 2006

Question	Strongly Disagree		Strongly Agree			Total
	1	2	3	4	5	
Today's Forum was worth my time	0	2	2	23	26	53
Topics were relevant	0	0	4	26	23	53
Speakers were well prepared	0	0	7	29	16	52
Well Organized	0	0	4	28	20	52
Good Format	0	1	8	22	21	52
I will likely attend future Forums	0	1	3	16	31	51
Total	0	4	28	144	137	

Topics I would like to see in the future:

More on watershed planning

Topics are appropriate and timely

Already doing a good job with topics and length of Forum

Wet weather WQS, CSOs and SSOs, UAA Case Studies for Urban Streams

Covered

It would be good if Director Childers could address this group once a year, UAA cases studies for urban areas

Funding improvements

I am concerned about the 393 issue. However on second thought, this will be addressed by Info on status of EPA Settlement Document

Use the Forum to address the WQ hot issues to receive help and input from the public

Permit Fee increases and program funding

DNR Funding

Explanation of EPA priorities and MO Work Plan document. It would be useful for the group to know what EPA's priorities are and how MO DNR plans on addressing them

More on EPA Region 7 initiative on Water Quality, Site Specific examples - problem/solution

Permit Fees

Upcoming legislation of interest to DNR-possibly ask for the group attending to help.

Clean Water Forum Evaluation Results

The Forum could be improved by:

Very good. Topics were interesting and timely.

Additional detail regarding specific advisory group recommendations and implications.

A second screen for those in the back half of the room. This may not be practical but it would be easier for all to see, especially in a longer room like this

Asking speakers to repeat questions or comments for audience before answering.

Consider different meeting room - current room is too deep

Having Workgroup members rather than staff report out

Doing workgroups in the morning and topical updates in the afternoon

Need handouts for each speaker

Allowing for actual discussion

Safe and Clean Water Forum

Bigger screen to show PowerPoint slides on

Great Job

Bigger room - screen on long wall

More Coffee

People who are not actively engaged in stakeholder process could leave with meeting without understanding the competing view points and areas where disagreement still exists. While not a part of the oral presentation, it would also be useful to provide a written summary of the topic and discussion to date, or the proposed policy or rule.

More "workshop" material to take home- handouts, etc.

Room and seating are too spread out. I was too far back to read slides.

Blue sheets should have an acronym key on back

More time for discussion

Set ground rules for Forum, ask others to limit side conversations during presentations

Copies of all presentations

Better more easily read PowerPoint slides

Other Comments:

Thanks for the lunch! Merry Christmas!

Specific to the Permit Assistance- The GIS portion of the permit assistance Wizard is great and I hope the detail available will grow for general use - not just with permitting.

Ed - You (and your staff) have done a great job bringing us where we are today. It was nice to laugh today. I don't think we were laughing together a year ago. -Chuck Reineke

I enjoy the comprehensive overview of ongoing activities and changes in the State program.

Good Lunch

Kudos to MDNR for your continued and genuine dedication to the public participation process

Good Meeting. Need a bit more audience participation. End was long

Remind people what the word "whisper" means. A few people didn't know what this meant or had the common courtesy to take their conversations outside of the room. This is probably a lost cause because some people like to hear themselves talk.

I hope all presentations will be available electronically.

Very encouraged by the "Permit Wizard"! Great Work.

Please continue the Forums - whatever you choose to call them

Please use a different meeting room which allows easier access to the restroom.

Works well as is!

Thanks for your dedication

Coordinate with USGS Stream Sampling?

Go ahead and change the name to "Water Protection Forum"

Sampling data on waters in lakes in Missouri, what about EPA's recently announced program to sample all lakes in America?

Good job keeping agenda on schedule!

Good cookies

Handouts were good, but abbreviated. Please provide further explanations or comments that were made online

Would like to hear about fees proposals, reorganization plans, Doyle's new initiatives, etc.

Permit Wizard - Great idea!

Presenters should have given more examples about how issues are manifested in MO waters

Less jargon

Thanks for keeping us informed!

Good Luck.
