Workgroup Survey**

# Triennial Review Survey

- We are about to begin the triennial review process, and we want feedback from you
- Conducted at December Forum meeting using “clickers”
- Survey Monkey sent through GovDelivery
- Totaled about 63 participants
- How important is a certain criteria to you?

# Number of "Very Important" responses

Are there additional criteria that you would like to see the department work on?

- Pharmaceuticals
- Micro plastics
- CAFO regulations
- Revisit dissolved oxygen 5.0 mg/L criterion
- Antibiotics and hormones
- Fishable, swimmable, lovable

## Water Quality Standards

The objective of the **Clean Water Act** of 1972 along with its amendments are to restore and maintain the chemical, physical, and biological integrity of the nation's waters. The first national set of water quality standards were published in 1983 and codified in 40 CFR Part 131. These regulations allow individual states to construct their own water quality standards framework providing there is no reduction in protection compared to federal guidelines.

**Missouri's Water Quality Standards**  are reviewed and modified every three years. Termed the triennial review process, coordinators with the Missouri Department of Natural Resources meet with the U.S. Environmental Protection Agency, other state agencies, and concerned citizens to evaluate the effectiveness of our standards. Issues for discussion were most recently identified during the 2014 solicitation of items to be included in the triennial review of the WQS. **Public Notice of Intent to Initiate Triennial Review** . Discussions of Water Quality Standards topics are being conducted through the water Protection Forum, **Water Quality Standards Workgroup**.

# Water Quality Standards

## Water Quality Standards

The objective of the **Clean Water Act** of 1972 along with its amendments are to restore and maintain the chemical, physical, and biological integrity of the nation's waters. The first national set of water quality standards were published in 1983 and codified in 40 CFR Part 131. These regulations allow individual states to construct their own water quality standards framework providing there is no reduction in protection compared to federal guidelines.

**Missouri's Water Quality Standards**  are reviewed and modified every three years. Termed the triennial review process, coordinators with the Missouri Department of Natural Resources meet with the U.S. Environmental Protection Agency, other state agencies, and concerned citizens to evaluate the effectiveness of our standards. Issues for discussion were most recently identified during the 2014 solicitation of items to be included in the triennial review of the WQS - **Public Notice of Intent to Initiate Triennial Review** . Discussions of Water Quality Standards topics are being conducted through the Water Protection Forum, **Water Quality Standards Workgroup**.

Water quality standards provide a means by which attainment of water quality objectives can be measured. The objective is protection of designated uses through the application of narrative or numeric **criteria**. The level of protection given to a stream, lake, or river is dependent on the expected or "designated use(s)," of that water. **Classified** waters in Missouri have been assigned the designated uses that are listed in 10CSR 20-7.031(C) page 10. The **antidegradation** section requires actions to maintain existing uses. Attainment frequency of water quality standards are used in identifying and characterizing waters of the state for purposes of compiling the **303(d)** list and

A scenic view of a rocky shoreline next to a large body of water, with a semi-transparent text box overlaid on the top left. The text box contains the word "Questions?" in a large, white, sans-serif font. Below it, the name "Angela Falls" is written in a slightly smaller white font, followed by the email address "angela.falls@dnr.mo.gov" in a smaller white font. The background shows a calm body of water meeting a rocky shore with some greenery on the right side.
