NATURAL RESOURCES

Eric R. Greitens, Governor

Carol S. Comer, Director

MEMORANDUM

DATE: JUN 26 2017

TO: Carol S. Comer, Director
Department of Natural Resources

THROUGH: Ed Galbraith, Director
Division of Environmental Quality

FROM: David J. Lamb, Acting Director 
Water Protection Program

SUBJECT: Annual Report to the Legislature on Affordability of Compliance Findings

In accordance with the requirements of Section 644.145 of the Revised Statutes of Missouri, the Department has prepared a report for the calendar year 2016 on affordability findings made by the Department. This report, attached hereto, should be forwarded to: Governor, the Speaker of the House of Representatives, the President Pro tempore of the Senate, and the Chairs of the committees in both houses having primary jurisdiction over natural resource issues.

The report summarizes the affordability analyses included in 190 findings of affordability made by the Department. In every case, the permit requirements were determined to be affordable, with the average projected increase in sewer rates being \$5.61 per household per month, and the average projected increase in sewer rates per household per month being 0.179% of the monthly median household income of the communities within which the sewer services were provided.

Tabular data were presented listing the permit holders and key statistical data examined in accordance with Paragraph 644.145.9 of the Revised Statutes of Missouri. The locations of wastewater treatment facilities subject to affordability findings during calendar years 2014 to 2016 were presented in a geographic map.

If you have any questions or comments, please contact Ms. Hebin Lin at 573-522-0095 or hebin.lin@dnr.mo.gov.

Annual Report on Affordability Findings of Compliance to the Missouri Clean Water Law For Calendar Year 2016

Pursuant to Section 644.145.1 of the Revised Statutes of Missouri (RSMo), enacted in 2011, the Department of Natural Resources (Department) has conducted affordability findings when issuing permits that incorporate a new requirement for discharges from publicly owned sewer systems or water or sewer treatment works, or when enforcing provisions of Chapter 644 or the Federal Water Pollution Control Act. This report presents the affordability findings conducted in the calendar year 2016.

Defined in Section 644.145.3(1) RSMo, affordability with respect to payment of a utility bill is “a measure of whether an individual customer or household with an income equal to or lower than the median household income for their community can pay the bill without undue hardship or unreasonable sacrifice in the essential lifestyle or spending patterns of the individual or household”, taking into consideration the criteria described in Section 644.145.4 RSMo (Appendix A).

The main body of the report presents the four categories of costs and impacts related affordability findings pursuant to Section 644.145.9 RSMo, and a geographical distribution of the affordability findings made in the calendar years 2014, 2015 and 2016. A description of the overall procedure for making the affordability findings during calendar year 2016 is provided in Appendix B.

1. Affordability Findings

(1) The Numbers of Findings of Affordability

The total numbers of findings of affordability issued by the Department, with effective dates between January 1, 2016 and December 31, 2016, were 190, including 190 findings categorized as affordable, zero findings categorized as not meeting the definition of affordable, and zero findings implemented as a federal mandate regardless of affordability.

(2) Average Increase in Sewer Rates

For the 190 findings found to be affordable, the average projected increase in monthly sewer rates was \$5.61 in terms of 2015 dollar values, and the average projected increase in monthly sewer rates compared with the current monthly sewer rates was 57.28%.

(3) Average Increase in Sewer Rates as Percentages of Median Household Income

For the 190 findings found to be affordable, the average projected increase in monthly sewer rates as a percentage of monthly median house income (MHI) was 0.179%, where MHIs were referred to the MHIs of the communities (counties, cities, villages, towns or census designated places) in which the service users were residing.

(4) List of All the Permit Holders Receiving Affordability Findings

All the permits holders receiving findings and data for the following indicators are provided in Table 1 below.

- (a) Current and projected monthly residential sewer rates in dollars;
- (b) Projected monthly residential sewer rates as percentages of monthly median household incomes; and
- (c) Percentages of households at or below the state poverty rate.

Table 1. Key Socioeconomic Data Utilized or Generated in the Affordability Findings Issued During 2016 (Cont.)

Notes

* This table is arranged in ascending order of permit numbers.

Projected Monthly Residential Sewer Rate as a percentage of the Monthly Median Household Income exceeds 2%. An affordability threshold for Projected Monthly Residential Sewer Rate as a percentage of the Monthly Median Household Income varies depending on the situation of each individual community. The cost analyses associated with these permits have resulted in findings that the Projected Monthly Residential Sewer Rates will likely be affordable. If additional information is provided in the future that indicate the Projected Monthly Residential Sewer Rates are unaffordable, the Department will modify the analyses and permits accordingly and grant extensions to schedules of compliance to mitigate the impacts on the residents.

** Abbreviations used in facility names include the following.

- CCSD - Calvey Creek Sewer District
- CGCRCSD - Cape Girardeau County Reorganized Common Sewer District
- DCSD - Duckett Creek Sanitary District
- MDC - Missouri Department of Conservation
- MDNR - Missouri Department of Natural Resources
- MDOC - Missouri Department of Corrections
- MoDOT - Missouri Department of Transportation
- NPSD - Northeast Public Sewer District
- PWSD - Public Water Supply District
- RMSD - Rocky Mount Sewer District
- USFWS - U.S. Fish & Wildlife Service Squaw Creek National Wildlife Refuge
- WWTF - Wastewater Treatment Facility
- WWTP - Wastewater Treatment Plant

*** Notation for data include the following.

- NA - data not available as the permittees did not provide their current user rates, although the Department had made attempts to obtain the information;
- / - generally not applicable for the analysis such as due to data not available for the "current monthly residential of sewer rate;"
- // - not applicable as schools, churches, nursing homes, airports, ports, training centers, and correctional centers do not finance the upgrade, operation, or maintenance of their wastewater treatment facilities based on residential sewer rates;
- /// - not applicable as federal-owned, state-owned, local government-owned systems do not finance the upgrade, operation, or maintenance of their wastewater treatment facilities based on residential sewer rates;
- //// - not applicable as different sewer districts user specific rate structures and they are generally considered as sufficient to comply with the permits;
- ///// - not applicable as this column only presents results of those permits that would induce increase of monthly residential sewer rate;
- ////// - data not included in the analyses for requirements for only sampling or monitoring.

**** Yes - affordable, No - not affordable, Mandate - federal mandate regardless of affordability.

2. Geographical Distribution: 2014-2016

The locations of the wastewater treatment facilities for which affordability findings have been conducted during calendar years 2014, 2015 and 2016 respectively are illustrated in Map 1 below.

Map 1. Locations of the Wastewater Treatment Facilities with Affordability Findings Issued in 2014, 2015 and 2016

3. Conclusion

Based on the information and data collected, derived and examined, all the affordability findings issued by the Missouri Department of Natural Resources during calendar year 2016 met the criteria of affordable.

This report was prepared by Hebin Lin, PhD, Economist, Operating Permits Section, Water Protection Program, Missouri Department of Natural Resources, June 2, 2017.

Appendix A. Subsections 644.145.4 and 644.145.9 of the Revised Statutes of Missouri

Revised Statutes of Missouri Chapter 644 Water Pollution

644.145.4. The department of natural resources shall adopt procedures by which it will make affordability findings that evaluate the affordability of permit requirements and enforcement actions described in subsection 1 of this section, and may begin implementing such procedures prior to promulgating implementing regulations. The commission shall have the authority to promulgate rules to implement this section pursuant to chapters 536 and 644, and shall promulgate such rules as soon as practicable. Affordability findings shall be based upon reasonably verifiable data and shall include an assessment of affordability with respect to persons or entities affected. The department shall offer the permittee an opportunity to review a draft affordability finding, and the permittee may suggest changes and provide additional supporting information, subject to subsection 6 of this section. The finding shall be based upon the following criteria:

- (1) A community's financial capability and ability to raise or secure necessary funding;
- (2) Affordability of pollution control options for the individuals or households at or below the median household income level of the community;
- (3) An evaluation of the overall costs and environmental benefits of the control technologies;
- (4) Inclusion of ongoing costs of operating and maintaining the existing wastewater collection and treatment system, including payments on outstanding debts for wastewater collection and treatment systems when calculating projected rates;
- (5) An inclusion of ways to reduce economic impacts on distressed populations in the community, including but not limited to low- and fixed-income populations. This requirement includes but is not limited to:
 - (a) Allowing adequate time in implementation schedules to mitigate potential adverse impacts on distressed populations resulting from the costs of the improvements and taking into consideration local community economic considerations; and
 - (b) Allowing for reasonable accommodations for regulated entities when inflexible standards and fines would impose a disproportionate financial hardship in light of the environmental benefits to be gained;
- (6) An assessment of other community investments and operating costs relating to environmental improvements and public health protection;
- (7) An assessment of factors set forth in the United States Environmental Protection Agency's guidance, including but not limited to the "Combined Sewer Overflow Guidance for Financial Capability Assessment and Schedule Development" that may ease the cost burdens of implementing wet weather control plans, including but not limited to small system considerations, the attainability of water quality standards, and the development of wet weather standards; and
- (8) An assessment of any other relevant local community economic condition.

644.145.9. The department shall file an annual report by the beginning of the fiscal year with the governor, the speaker of the house of representatives, the president pro tempore of the senate, and the chairs of the committees in both houses having primary jurisdiction over natural resource issues showing at least the following information on the findings of affordability completed in the previous calendar year:

(1) The total number of findings of affordability issued by the department, those categorized as affordable, those categorized as not meeting the definition of affordable, and those implemented as a federal mandate regardless of affordability;

(2) The average increase in sewer rates both in dollars and percentage for all findings found to be affordable;

(3) The average increase in sewer rates as a percentage of median house income in the communities for those findings determined to be affordable and a separate calculation of average increases in sewer rates for those found not to meet the definition of affordable;

(4) A list of all the permit holders receiving findings, and for each permittee the following data taken from the finding of affordability shall be listed:

(a) Current and projected monthly residential sewer rates in dollars;

(b) Projected monthly residential sewer rates as a percentage of median household income;

(c) Percentage of households at or below the state poverty rate.

Appendix B. Overall Procedure for Making Affordability Findings

The Department conducts an affordability finding, or a Cost Analysis for Compliance (CAFCom), as part of the renewal process for a National Pollutant Discharge and Elimination System (NPDES) permit, utilizing the following four primary tools and data sources:

(1) A Financial Questionnaire with a Community Supplemental Survey sent to permit holders categorized as a Publicly Owned Treatment Works (POTW) for collecting information on the sustainability and financial capability of a municipality; examples of information requested are the “current monthly residential sewer rates”, and primary socioeconomic indicator (Table 1), and “property tax collection rate in the municipality”, a secondary socioeconomic indicator;

(2) The Affordability PreScreening Tool developed by the Department for compiling and analyzing socioeconomic data available from national, regional and local databases, including statistics from the U.S. Census Bureau; an example of data being “monthly median household income” (Table 1) and “percentage of households at or below poverty” (Table 1);

(3) A CAPDEWORKS Model developed by Hydromantis Environmental Software Solutions, Inc. for estimating the capital costs and operating and maintenance costs for different wastewater treatment technologies for compliance of upgrades so as to calculate the “projected monthly residential sewer rate” (Table 1);

(4) The Missouri Rural Population Sustainability Assessment Tool developed by the Environmental Finance Center at Wichita State University for assessing the potential of growth and sustainability of each rural community.

Once the draft NPDES permit is completed, the permit holder is given the opportunity to review and comment on the draft permit and the CAFCom during the 15 day preview and 30 day public notice period. This review and comment periods offer permit holders an opportunity to provide additional information in regard to their community’s unique financial situations before the final NPDES permit is issued. When the operating permit contains a Schedule of Compliance, during the 15 day preview, Department staff contact the permit holder via phone calls to ensure the permit holder has received and understood the draft permit and the CAFCom.

Eric R. Greitens, Governor

Carol S. Comer, Director

JUN 29 2017

The Honorable Eric R. Greitens
Governor of Missouri
201 West Capitol Avenue, Room 216
Jefferson City, MO 65101

Dear Governor Greitens:

Pursuant to Section 644.145.1 of the Revised Statutes of Missouri, enacted in 2011, the Missouri Department of Natural Resources has conducted affordability findings when issuing permits that incorporate a new requirement for discharges from publicly owned sewer systems or water or sewer treatment works, or when enforcing provisions of Chapter 644 or the Federal Water Pollution Control Act.

This report presents the 190 affordability findings conducted by the department in the calendar year 2016. In every case, the permit requirements were determined to be affordable, with the average projected increase in sewer rates being \$5.61 per household per month, and the average projected increase in sewer rates per household per month being 0.179% of the monthly median household income of the communities within which the sewer services were provided.

Tabular data were presented listing the permit holders and key statistical data examined in accordance with Paragraph 644.145.9 of the Revised Statutes of Missouri. The locations of wastewater treatment facilities subject to affordability findings during calendar years 2014 to 2016 were presented in a geographic map.

The department appreciates your review of this information and is available to answer any questions you might have.

Sincerely,

DEPARTMENT OF NATURAL RESOURCES

Carol S. Comer
Director

CSC/hls
