Total Maximum Daily Load Information Sheet

Koen Creek

Water Body Segment at a Glance:

County: St. Francois
Nearby City: Deslodge
Water Body ID: 2171
Length of Segment: 1 mile
Watershed Size: 11.7 square miles
Pollutant: Fishes bioassessments
Source: Unknown

Statewide Map Showing Location of Watershed

Scheduled for TMDL development: 2022

Description of the Problem

Designated beneficial uses of Koen Creek:

- Livestock and Wildlife Watering
- Protection of Warm Water Aquatic Life
- Protection of Human Health (Fish Consumption)
- Secondary Contact Recreation
- Whole Body Contact Recreation – Category B

Uses that are impaired:

- Protection of Warm Water Aquatic Life

Standards that apply

The state's general water quality criteria at 10 CSR 20-7.031(3) are applicable to all waters of the state at all times. No water contaminant, by itself or in combination with other substances, shall prevent the waters of the state from meeting the following conditions:

- Waters shall be free from substances or conditions in sufficient amounts to result in toxicity to human, animal, or aquatic life [10 CSR 20-7.031(3)(D)].
- Waters shall be free from physical, chemical, or hydrologic changes that would impair the natural biological community [10 CSR 20-7.031(3)(G)].

Background information and water quality data

Koen Creek is a tributary of Flat River, which it joins in Desloge, Mo. Fisheries data for Koen Creek were collected by the Missouri Department of Conservation. The diversity of fishes in a stream as well as the kind of fish in a stream can be used as an indicator of stream health. Data is inadequate to develop a fisheries scoring system to determine impairment for prairie streams, however the Department of Natural Resources in consultation with the Missouri Department of Conservation determined that the available fisheries data for Koen Creek do show an impaired condition.

Map Showing the Koen Creek Watershed

Note: Final TMDLs developed for Koen Creek will be based on the most current and available data and information.
