

REMINDER

When your sample bottles are received the box will contain the amount of bottles for the number of Lead and Copper samples you are required to take. You **MUST** collect and return each sample – failure to do so will cause your system to incur a monitoring violation. If a sample bottle is lost or not returned by a customer/sample collector, please contact the Lead and Copper Coordinator at 573-751-1406 immediately and replacement bottle(s) can be sent.
