Mr. John Findlay, P.E., Project Engineer  
City of Liberty  
101 East Kansas  
Liberty, MO 64068

RE: City of Liberty – Technical Specifications and Design Criteria revised March 2016, ACT148,  
Standard Sewer Specifications and Details Approval

Dear Mr. Findlay:

The Missouri Department of Natural Resources' Water Protection Program has reviewed and approved the Technical Specifications and Design Criteria revised March 2016 received on March 14, 2016. Sewer extension projects, using these specifications, for which the city of Liberty will be the continuing authority, will not be required to submit the standard specifications in order to be considered a complete application. This approval is granted from the date of this letter until such date the city modifies the standard specifications.

The department recommends the city of Liberty consider applying for the Approved Sewer Program. "Persons who construct sewers tributary to a system operated by one (1) of the continuing authorities listed in paragraphs (3)(B)1. or (3)(B)2. will be exempt from the construction permit requirements for sewers if the continuing authority administers a permit program which has been approved by the department", per 10 CSR 20-6.010(6)(A). Part of this application process requires approvable standard specifications and details, for which you have obtained.

### CONDITIONS:

1. Any updates to the city of Liberty's Technical Specifications and Design Criteria revised March 2016 will require a subsequent review and approval by the department.
2. This approval is limited to sewer extensions proposed within the city of Liberty boundaries or in the instances the proposed sewer extension is outside of the city's boundaries, the city of Liberty will act as the continuing authority for the proposed sewer extension. Sewer extensions that are outside of the city of Liberty boundaries and the city waives the right to continuing authority must submit specifications with the construction permit application in accordance with 10 CSR 20-6.010(4)(D)2., 10 CSR 20-6.010(6)(A)1.A., and 10 CSR 20-8.110(7).

Mr. John Findlay, P.E., Project Engineer  
Page Two

3. Construction, installation, expansion or modification of any collection system or wastewater treatment facility is prohibited until a construction permit is issued by the department, per 10 CSR 20-6.010(4)(A).
4. Nothing in this approval removes any obligations to comply with county or other local ordinances or restrictions.
5. This approval is invalid for projects required to comply with the requirements contained in 10 CSR 20-4, "Grants and Loans".
6. This approval is limited to only wastewater components. Other items contained in this standard specification and details such as drinking water, roadways, structural, mechanical, electrical, etc. were not reviewed.
7. This approval may be reopened and modified to comply with any new or amended design regulations in 10 CSR 20-8.

If you have any questions concerning this matter, please contact Mrs. Emily Carpenter, of the Water Protection Program, at 573-751-6569 or Missouri Department of Natural Resources, P.O. Box 176, Jefferson City, MO 65102.

Thank you for your efforts to help ensure clean water in Missouri.

Sincerely,

WATER PROTECTION PROGRAM

John Madras  
Director
