RE: City of Nixa Missouri

Standard Specifications for Sewer Main Construction – Article V

Dear Byron:

In my response dated June 1 regarding the above specifications I inadvertently left out Article V of the specifications. Please find two copies of Article V of the City's "Standard Specifications for Sewer Main Construction".

Note that there are no specific details which address this section of the specifications. Typically the design engineer on a particular project submits construction drawings which provide details of the submersible pump station and related equipment, the City reviews the drawings and approves them.

Please review the enclosed specifications for compliance with the regulations and upon approval by your department it is the intent of the City of Nixa to adopt these specifications by ordinance.

If you have any questions please feel free to contact me at (417) 725-4663 or gs@shafferhines.com.

Sincerely;

SHAFFER & HINES, INC.
