MEMORANDUM

DATE: JUN 26 2008

TO: Water Pollution Control Branch Staff
Regional Directors
Regional Office Water Pollution Staff

FROM: Edward Galbraith, Director
Water Protection Program

SUBJECT: Missouri State Operating Permit and Fact Sheet Template for Landfill Activities

In past Regional Office/Central Office conference calls, Regional Office Water Pollution staff had requested that the Water Protection Program staff develop a concise Missouri State Operating Permit (MSOP) and Fact Sheet for all Landfill Activities in the State of Missouri. The attached draft MSOP and Fact Sheet is such a template to bring consistency our MSOP's and Fact Sheets.

The attached draft MSOP and Fact Sheet establishes a procedure for developing operating permits for landfill activities, and documents the process for determining appropriate and applicable terms, conditions, monitoring requirements, and effluent limitations. Because this template cannot encompass all unique situations encountered when developing MSOPs for landfill activities, staff is encouraged to contact the Central Office with site-specific questions.

Please use this template when developing MSOP's and Fact Sheets for Landfill Activities. In addition the draft MSOP and Fact Sheet is located in the department's T drive: T:_PERMITTING DOCUMENTS\Draft Permit Templates\Draft Permit for Landfill Activities.
