

3.8.2 Overview of the Permit/Sewer Extensions/ Facility Description

Applicability:

This outlines the information required to complete Sections 1.1, 1.2, 3.1 and 3.2 of the Application for Construction Permit – Sewer Extension.

Content:

The name and location of the project and a brief description of it are required. The application form is considered incomplete without this information. The information required is:

- The name of the project or the name of the development or subdivision in which the sewers are being constructed,
- The identification number of the SRF loan, state grant, Community Development Block Grant, or federal grant or loan if the project is being constructed with this type of funding,
- The location of the project by street or road name, or other information that provides a clear location for the project,
- A description of the project to include the number of manholes; the diameter, type and linear feet of each type of sewer; lift station characteristics including the number and type of pumps, pump capacity, emergency storage available, standby generators (if any), control and alarm system data; and the name of the project engineer.
- A summary of the design information for the project including population and/or number of lots to be served, estimated flow, industrial waste contribution, and information about the receiving sewer.
