

4.6.5.6 Application and Review Process/Completing Permit Application Forms/ Permit Fees/Permit Modification Fees

Applicability:

Discusses the fees payable to the state of Missouri with requests to modify an existing operating permit.

Content:

The terms and conditions of operating permits may be modified during the permit period or at the time of permit renewal. A written request for the modification must be submitted by the permittee stating the reason for the modification. If at the time of permit renewal, the information contained in the application must reflect the change. The department may initiate modification of a permit for the reasons stated in 10 CSR 20-6.010(8)(A)2, which are:

- Noncompliance,
- Misrepresentation or failure to fully disclose information when obtaining a permit,
- A change in the permitted facility, and
- A change of limits due to the completion of a waste load allocation study.

The legal basis for modification fees is in the Clean Water Law, Section 644.052.7 and .8, and in the regulations at 10 CSR 20-6.011(2)(B) and (C) and Appendix A. Publicly owned facilities must pay a fee of \$200.00 for permit modifications. Permits for all facilities other than publicly owned pay a modification fee amounting to 25% of the annual permit fee.

Operating permit modification fees are not required for:

- Modifications initiated by the department,
- Modifications necessary due to an error made by the department,
- Modifications that occur during the regular renewal of a permit, and
- Modifications for the removal of an outfall.

There are no provisions in the Clean Water Law or regulations addressing fees for modifications of construction permits.
