Allocation Of Available Loan Funds

Missouri law requires that twenty percent and fifteen percent of available funds, respectively, shall be made available to water systems serving populations of 3,300 or less (designated as very small communities) and water systems serving populations of 3,301 to 9,999 (designated as small communities). The remaining sixty five percent (designated for general community) is not restricted by population served.

It is important to note:

- * The fundable project lists may change significantly between the draft Intended Use Plan placed on public notice and the final version approved by the Safe Drinking Water Commission.
- * The inclusion of a project on the fundable list is not a guarantee of funding. Other factors, such as timely progress toward funding, compliance with program requirements and funding availability, may impact project funding.
- * Projects carried over from the 2018 Intended Use Plan remain eligible for the 2019 fiscal year and retain the points they received under the criteria in effect at the time they initially applied. Carry-over projects in the fiscal year 2019 Intended Use Plan must reapply by February 15, 2019 in order to compete for eligible funding in fiscal year 2020 Intended Use Plan.
- * If a system is utilizing a Contract For Engineering Services: Design and Development for Community Water Systems Grant from the Department, their SRF project was reduced by a like amount.
