Ms. Cheryl Crisler
U.S. Environmental Protection
Agency, Region VII
901 N. Fifth Street
Kansas City, KS 66101

Dear Ms. Crisler:

We have received and reviewed your comments on the draft N. Moreau Creek TMDL study document, and we have edited it appropriately. We now submit this document as a final TMDL under Section 303(d) of the Federal Clean Water Act for EPA review and approval. We will maintain an administrative record of the development of this document in our files.

Sincerely,

WATER POLLUTION CONTROL PROGRAM

Edwin D. Knight
Director

Re: TMDLs for Clear Creek and N. Moreau Creek

Dear Ms. Crisler:

Enclosed please find a copy of the revised total maximum daily load studies (TMDL) for Clear Creek below the city of Monett, Barry County, Missouri and for the North Moreau Creek below the city of California, Missouri. These TMDLs are submitted for approval by the U.S. Environmental Protection Agency pursuant to section 303(d)(2) of the federal Clean Water Act and are to replace earlier submissions for these two TMDLs.

We appreciate EPA's assistance in revising these TMDLs and in taking prompt action on them. If you have any questions, please contact John Madras or me at (573) 751-7428.

Sincerely,

WATER POLLUTION CONTROL PROGRAM

Edwin D. Knight
Director

Subject: N. Moreau TMDL

Attached is the revised N. Moreau Creek TMDL. I have revised the wording dealing with how CBOD, Ammonia and NFR limits were empirically derived and added an appendix showing that water quality based limits at 19 other facilities fell in the same general range as the limits at

California south. N_MoreauTMDLlast.do
