

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 7
901 NORTH 5TH STREET
KANSAS CITY, KANSAS 66101

December 21, 2010

Mr. John Madras, Director
Water Protection Program
Water Protection and Soil Conservation Division
Missouri Department of Natural Resources
1101 Riverside Drive
Jefferson City, Missouri 65101

Dear Mr. Madras:

Re: Establishing Wyaconda Lake
Total Maximum Daily Load

On behalf of the U.S. Environmental Protection Agency (EPA), I hereby transmit EPA's Total Maximum Daily Load (TMDL) for Wyaconda Lake located in Clark County, Missouri, established on December 21, 2010.

EPA is establishing this TMDL to meet the requirements of the 2001 Consent Decree (*American Canoe Association, Inc., et al. v. EPA*, No. 98-482-CV-W).

Wyaconda Lake was identified on the 2008 Missouri Section 303(d) List as impaired due to Atrazine. The specific impairments (water body segment and TMDL pollutants) are:

<u>Water Body Name</u>	<u>WBID</u>	<u>Pollutant</u>
Wyaconda Lake	MO_7009	Atrazine

This TMDL is also established in accordance with Section 303(d) of the Clean Water Act. EPA public noticed this document from October 29 to December 1, 2010. The Missouri Department of Natural Resources (MDNR) assisted with distribution of the draft TMDL to stakeholders in Missouri. One comment letter was received. Please refer to the *Summary of Comments and Responses* document, which is enclosed with this letter, for more detailed information about EPA responses.

Federal regulation, 40 CFR 130.6(c)(1), requires the state to incorporate this TMDL, along with appropriate implementation measures, into Missouri's Water Quality Management Plan. To assist in planning implementation and follow-up monitoring efforts, the TMDL document may include monitoring recommendations. These recommendations are not part of

the Wyaconda Lake TMDL established by EPA at this time and EPA understands that the state is responsible for developing implementation plans necessary to attain TMDLs.

If the state adopts and EPA approves TMDLs for this water body and pollutants which are different from the TMDL established today, the state adopted TMDLs would supersede the EPA established TMDL.

We appreciate Missouri's partnership in developing and public noticing this TMDL. We will continue to cooperate with and assist, as appropriate, in future efforts by MDNR to develop TMDLs.

Sincerely,

William A. Spratlin
Director
Water, Wetlands and Pesticides Division
