

DRAFT **Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: July 18, 2008

Water Body Under Evaluation:

Water Body ID #: 0710
Name: Stinson Creek (Class C)
Length of Segment: 11.9 miles
County(ies): Callaway

Use Attainability Analysis (UAA) Study:

UAA ID #: 0322
Submitter: MEC Water Resources
Date(s) Conducted: October 10, 2007
Date Received: December 1, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in October 2007 and no WBCR was observed. One interview was conducted during the survey citing secondary contact uses including: fishing, gravel mining, and hunting via the stream corridor. Evidence of secondary contact (ATV tracks, access road/low water crossing, fire pit) was observed during the survey.

Is the evaluated use attainable? Yes No

Comments: The stream met the maximum depth criterion at 1 out of 5 sites evaluated. Due to the stream meeting the maximum depth criterion, the committee recommends the WBCR use designation be retained. Due to evidence and documented secondary contact, the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

- Add Use Retain Use Remove Use
- Modify Use Inconclusive

Committee Members: Anne Peery, Bill Whipps, Mike Kruse
