

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: November 26, 2010

Water Body Under Evaluation:

Water Body ID #: 1201  
Name: Macks Creek (Class C)  
Length of Segment: 2.8 miles  
County (ies): Camden

Use Attainability Analysis (UAA) Study:

UAA ID #: 1312  
Submitter: Olsson Associates  
Date(s) Conducted: August 15 and 18, 2008  
Date Received: October 14, 2008  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975?  Yes  No  Unknown

Comments: The UAA survey was conducted in August 2008 and no evidence of WBCR was observed. A 4-wheeler was observed on a gravel bank near the creek and ATV tracks and foot path/prints were also noted. No interviews were conducted.

Is the evaluated use attainable?  Yes  No

Comments: The stream did not meet the maximum or median depth criteria. Because the stream did not meet the depth criteria and there was no evidence of existing use, the committee recommends that the WBCR use designation be removed. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

**Committee Recommendation:**

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
