- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in October 2008 and no evidence of WBCR was observed. A 2005 interview cites fishing as occurring on this stream. No interviews were conducted in the 2008 survey.

Is the evaluated use attainable? Yes No

Comments: The stream did meet the maximum depth criterion at 2 of the 3 sites evaluated. Also according to the 2005 UAA there was an interview conducted stating that pools deep enough for swimming were present. Because the stream meets the maximum depth criterion, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation: Add Use Retain Use Remove Use
