

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: February 5, 2009

Water Body Under Evaluation:

Water Body ID #: 1721
Name: Little Creek (Class C)
Length of Segment: 1.5 miles
County(ies): Jefferson

Use Attainability Analysis (UAA) Study:

UAA ID #: 0813
Submitter: MEC Water Resources
Date(s) Conducted: October 8, 2007
Date Received: December 1, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in October 2007 and no WBCR was observed. No interviews were conducted during the survey. ATV tracks were documented at all 3 sites; there is a housing development adjacent to stream at site 1, and there is a pump with a hose in the stream at site 2.

Is the evaluated use attainable? Yes No

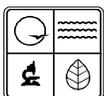

Comments: The stream did not meet the depth criteria at any of the 3 sites evaluated. Due to not meeting the depth criteria and no evidence of existing use, the committee recommends the WBCR use designation be removed. However, due to evidence of secondary contact (ATV tracks, houses, pump); the committee recommends that Secondary Contact Recreation be assigned.

Committee Recommendation:

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
