

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: December 6, 2010

Water Body Under Evaluation:

Water Body ID #: 2191
Name: Sugar Creek (Class C)
Length of Segment: 5.5 miles
County (ies): Jefferson

Use Attainability Analysis (UAA) Study:

UAA ID #: 1362
Submitter: MEC Water Resources
Date(s) Conducted: October 17, 2008
Date Received: October 24, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in October 2008 and no evidence of WBCR was observed. It was noted in the survey that portions of the stream were near homes and playgrounds. ATV tracks were observed on this stream during a 2007 UAA. No interviews were conducted.

Is the evaluated use attainable? Yes No

Comments: The stream met the maximum depth criterion at 1 of 4 sites evaluated. A 2007 UAA also found the stream to be meeting the depth criteria. Because the stream has met the maximum depth criterion, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation:

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
